A MESSAGE FROM THE STATE OF WASHINGTON

The Washington State Commercial Vehicle Guide 2006–2007 is intended for the professional commercial vehicle operator and others who are concerned about safe truck operations. It has been compiled by the Office of Motor Carrier Services within the Washington State Department of Transportation (WSDOT) in cooperation with the Commercial Vehicle Enforcement Division of the Washington State Patrol (WSP/CVD), Washington State Department of Licensing (WSDOL) Driver and Vehicle Services Divisions, the Washington Utilities and Transportation Commission, and the U.S. Department of Transportation, Federal Motor Carrier Safety Administration (FMCSA), in an effort to provide a starting point for information for commercial vehicle operators driving within the State of Washington.

The Washington State Commercial Vehicle Guide 2006–2007 is a tool. Carriers are responsible for knowing and complying with all state and federal regulations, whether or not they are discussed in the guide. For enforcement officers, the information in the guide has been condensed and summarized and must not be cited in place of specific federal and state laws. Do not use this guide as the basis for legal interpretations. It cannot, and does not, contain all of the rules and regulations that apply to operating a commercial vehicle safely within the State of Washington. The guide does contain sufficient information for you as a commercial vehicle operator, to confidently and safely operate your commercial vehicle within our state. For more detailed information, we recommend you contact the pertinent agency or consult the Code of Federal Regulations (CFR), Revised Code of Washington (RCW), Washington Administrative Code (WAC), or the appropriate hazardous materials regulations.

The 2006–2007 edition is the fifth edition of the *Washington State Commercial Vehicle Guide*. We welcome your ideas and suggestions on how the Guide can be improved. Please send your comments and ideas to:

Washington State Department of Transportation Commercial Vehicle Services/Motor Carrier Services 7345 Linderson Way SW P.O. Box 47367 Olympia, WA 98504-7367

> Phone: (360) 704-6340 Fax: (360) 704-6350

PLEASE DRIVE SAFELY AND ENJOY OUR BEAUTIFUL STATE

Introduction

The Washington State Department of Transportation, Department of Licensing, Washington Utilities and Transportation Commission, and Washington State Patrol share a set of objectives intended to provide for the safety of the motoring public, protect the public infrastructure, and work with industry to produce safe, efficient, and economical solutions to commercial vehicle transport.

The **Washington State Patrol** (WSP), through its Commercial Vehicle Division, strives to protect the integrity and safety of the state highways system by promoting public compliance through enforcement, education, and the application of modern technology for enforcement of size, weight, load, and equipment laws mandated by state and federal government. WSP also administers and enforces state laws, administrative code, and federal rules relating to motor vehicle safety. Effective April 25, 1994, WSP adopted Parts 382-383, 390-393, and 395-397 of Chapter 49 Code of Federal Regulation (CFR) for commercial motor vehicles.

The Washington Utilities and Transportation Commission (WUTC) regulates all privately-owned electric, natural gas, and telephone companies. WUTC also regulates a limited number of solid waste collection companies, water companies, bus companies, household good movers, and railroads. WUTC prescribes rules and regulations for household goods carriers and common carrier brokers in the state of Washington. WUTC also administers and enforces Washington State laws, administrative code, and federal rules relating to motor vehicle safety. For those carriers subject to Commission regulations, WUTC publishes rule books containing complete carrier regulations (excluding Federal Regulations). The rule books are available, free of charge, by contacting WUTC at (360) 664-1222. Copies may be obtained from WUTC upon request, subject to pertinent copying charges. Copies are also available from the Government Printing Office, Seattle, Washington, and numerous other private vendors.

The **Washington State Department of Transportation** (WSDOT) administers the vehicle size and weight state laws, administrative code, and federal rules. WSDOT, through its Motor Carrier Services Office, is authorized, by statute, to issue special permits to operate vehicles of a size or weight greater than the legal maximum on state highways. Permits are issued through approximately 40 locations statewide (see page 54). The Motor Carrier Services Office also offers approved companies the opportunity to self-issue permits through eSNOOPI which is a web-based permitting program.

The **Department of Licensing** (DOL), as part of their overall responsibilities, administers state laws and administrative code relating to the licensing and regulation of vehicles and regulation of vehicle operators, dealers, and manufacturers.

Commercial vehicle operations within the state of Washington are based on the following criteria:

CFR - Code of Federal Regulations (adopted by statute)

RCW – Revised Code of Washington (state statutes)

WAC – Washington Administrative Code (agency rules)

Specific booklets and brochures are also available. Some selected titles are:

- Revised Code of Washington (RCW) selected titles
- Washington State Commercial Driver's Guide (DOL)
- Your Guide to Achieving a Satisfactory Safety Record (WUTC), IRP/PRORATE

Informational brochures, in many cases, are available at many of the interstate highway weigh stations.

Transportation Agencies Contacts

This guide is intended to cover situations and answer questions that arise most frequently. However, situations may occur where specific answers are needed. The following offices will usually be able to provide either answers or direction:

Department of Licensing

Vehicle Services (360) 664-1858 (Prorate) (360) 664-1868 (IFTA)

Driver Services

Commercial Driver's License (CDL) (360) 902-3960 Commercial driver's license and medical cards.

Utilities and Transportation Commission

Permits

(360) 664-1222 Fax: (360) 586-1181

E-mail: traninfo@wutc.wa.gov

Authority to carry freight for hire, certificate or necessity, and exempt commodities.

Washington State Patrol

Commercial Vehicle Enforcement Division (360) 753-0350 Equipment requirements, enforcement practices, road conditions, and weight enforcement.

Department of Transportation

Permits (Motor Carrier Services) (360) 704-6340 Interpretation of statutes or rules, restricted roads or bridges, permit practices, and construction projects.

U.S. Department of Transportation

Federal Motor Carrier Safety Administration (360) 753-9875

Section One

Commercial Vehicle Enforcement

(Washington State Patrol)

Speed Limits

Washington State law establishes a 60 mph basic speed for state highways. Both decreases and increases to that basic speed are authorized by law, but both must be based on engineering and traffic investigations by the Washington State Department of Transportation (WSDOT). State law also mandates a maximum speed limit of 70 mph, with the exception of vehicles over 10,000 pounds gross weight (large trucks) and vehicles in combination (trucks with trailers, for example). Their maximum speed is 60 mph.

Slow Vehicle Rule

If you are driving a slow-moving vehicle on a two-lane highway, the slow vehicle rule applies. If you have five or more vehicles behind you, you must make way at the first available and safe turnout to allow following vehicles to safely pass you. When traveling in convoy with other trucks on two lane roads, you must leave sufficient room between your vehicles to allow other traffic to safely pull back into your lane of traffic.

Crossview Mirrors and Backup Alert

(RCW 46.37.400)

Every truck registered or based in Washington State that is equipped with a cube-style walk-in cargo box, up to 18 feet long, used in the commercial delivery of goods and services, must be equipped with a rear crossview mirror or backup device to alert the driver that a person or object is behind the truck.

Left-Lane Restrictions

Any vehicle towing a trailer, or other vehicle or combination over 10,000 pounds, may not be driven in the left-hand lane of limited-access roadways that have three or more lanes in one direction, excluding HOV (high occupancy vehicle) lanes. This includes commercial trucks, recreational vehicles, vehicles towing boats, and any car or truck towing a trailer. Commercial vehicles over 10,000 pounds GVW are prohibited from HOV lanes, even with the minimum number of occupants specified on signs.

This law affects any limited-access roadway that has three or more general purpose lanes in one direction. The law primarily affects I-5, portions of I-90 and I-405 in King and Snohomish Counties, and portions of I-90 in Spokane. It does not apply to HOV lanes, or to drivers of affected vehicles who are preparing to turn left at an intersection, or exit onto a private road or driveway. WSDOT will have signs posted in those areas where the law is in affect. Failure to obey the law in areas where signs are posted will result in a citation by the Washington State Patrol (WSP).

VEHICLES
WITH TRAILERS
OR OVER
10,000 LBS

PROHIBITED
IN
LEFT LANE

Load Securement Information

For specific load securement laws, contact the WSP Commercial Vehicle Division at (360) 753-0350.

Preventing Escape of Load — All loads and any required covering must be secured. All vehicles loaded with dirt, sand, or gravel which do not maintain at least six (6) inches of freeboard must have a secured cover.

Any vehicle with deposits of mud, rock, or other debris on the vehicle's body, fenders, frame, undercarriage, wheels, or tires shall be cleaned of such material before the operation of the vehicle on a paved public highway. A broom and shovel should be carried in the truck to accomplish this cleaning.

If the load is a type of material that will be blown from the vehicle while the vehicle is in motion, then that type of load shall be covered to prevent this from occurring.

The six (6) inches of freeboard shall be maintained, if the load is not covered, after the load has had an opportunity to settle. See RCW 46.61.655.

Tire Chain Requirements

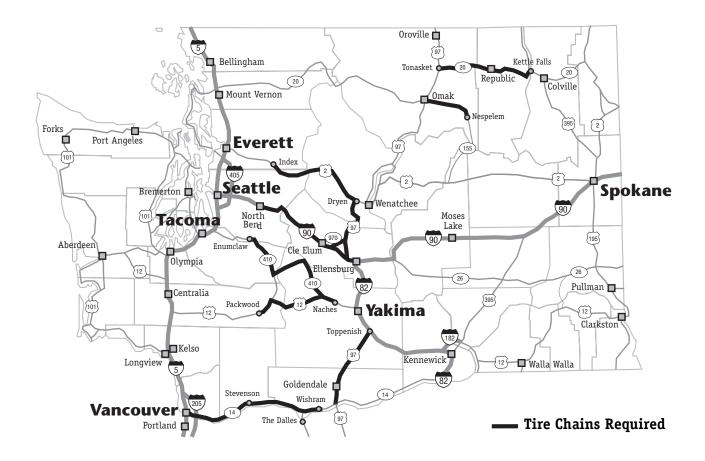

(WACs 204-24-050 and 468-38-095)

From November 1 to April 1 of each year on the following routes, all vehicles and combinations of vehicles over 10,000 pounds shall carry sufficient tire chains to meet the requirements of this chapter.

- I-90 between North Bend (MP 32) and Ellensburg (MP 101)
- I-82 between Ellensburg Exit 3 (MP 3) and Selah Exit 26 (MP 26)
- SR 97 between (MP 145) and Junction SR 2
- SR 2 between Dryden (MP 108) and Index (MP 36)
- SR 12 between Packwood (MP 135) and Naches (MP 187)
- SR 97 between junction SR 14 (MP 4) Columbia River and Toppenish (MP 59)
- SR 410 from Enumclaw to Naches
- SR 20 between Tonasket (MP 262) and Kettle Falls (MP 342)
- SR 155 between Omak (MP 79) and Nespelem (MP 45)
- SR 970 between (MP 0) and (MP 10)
- SR 14 (MP 18) to Junction 97 (MP 102)
- SR 542 Mt. Baker Highway between (MP 22.91) and (MP 57.26)

Vehicles making local deliveries, as indicated on bills of lading, and not crossing the mountain pass are exempt from this requirement if operating outside of a chain required area.

All vehicles over 10,000 pounds gross vehicle weight **shall carry a minimum of two (2) extra chains** for use in the event that road conditions require the use of more chains or in the event that chains in use are broken or otherwise made useless. Approved chains for vehicles over 10,000 pounds gross vehicle weight shall have at least two side chains to which are attached sufficient cross chains of hardened metal so that at least one cross chain is in contact with the road surface at all times. Plastic chains shall not be allowed. The State Patrol may approve other devices as chains if the devices are equivalent to regular chains in their performance (cable chains allowable).

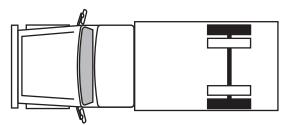

Please use caution during the winter months while you are applying or removing chains from your vehicle. It is unlawful for you to apply or remove chains in the traveled portion of the roadway. Most passes have sufficient room for you to pull off the traveled portion of the road and chain up safely.

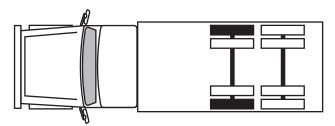

The Washington State Department of Transportation or Washington State Patrol may prohibit any vehicle from entering a chain/approved traction device control area when it is determined that the vehicle will experience difficulty in safely traveling the area.

Minimum Chain Requirements for Vehicles and Combinations Over 10,000 Pounds GVWR

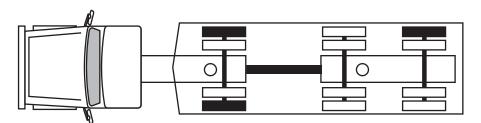

Two to Four Axles

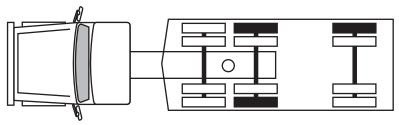

One tire on each side of the drive axle.

Either drive axle, one tire on each side, same axle.

One tire on each side of the drive axle and one tire on either side of the trailer. This includes auto transporters with single drive axles.

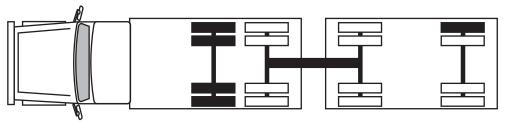

Either drive axle, one tire on each side of the same axle, and one tire on either side of the trailer.

Winter Road Information

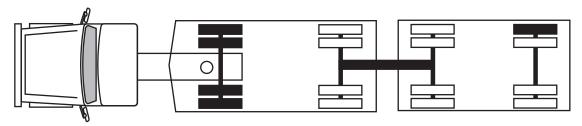

Department of Transportation *www.wsdot.wa.gov* or 1-800-695-7623 (for traffic cameras and pass report information)

Washington State Patrol www.wsp.wa.gov

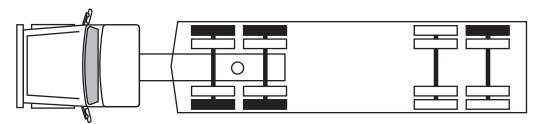

Five Axles

All tires on one drive axle and one tire on either side of last trailer axle.

All tires on the drive axle and one tire on either side of the last axle of the last trailer.

All tires on one drive axle or one tire on each side of both drive axles. One tire on either side of either trailer axle. This includes Automobile Transporters.

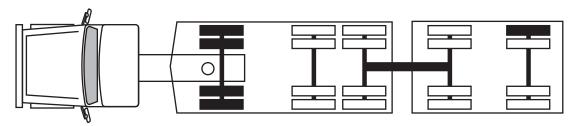

Movement by permit on mountain passes is prohibited where any of the following signs are displayed:

- TRACTION ADVISORY/OVERSIZED VEHICLES PROHIBITED
- CHAINS REQUIRED ON ALL VEHICLES EXCEPT ALL-WHEEL DRIVE
- VEHICLES OVER 10,000 GVWR, CHAINS REQUIRED

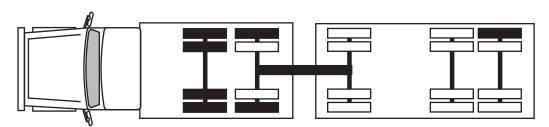

Exempt from this restriction against movement is the following class of motor vehicles:

- A single trailer not exceeding 56 feet in length, including load.
- Double trailers not exceeding 68 feet in length, including load.
- 61 foot long non-divisible loads (which includes trailer).

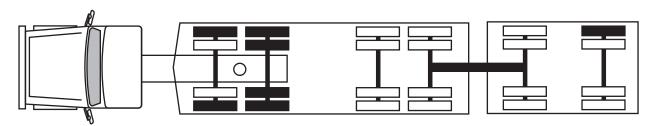

Six or More Axles

All tires on the drive axle and one tire on either side of the last axle of the last trailer.

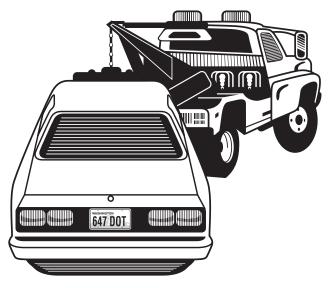

All tires on one drive axle, one tire on each side of second drive axle, and one tire on either side of the last two axles.

Only on six or more axle combinations when posted "CHAINS REQUIRED" one additional tire on each side of the drive axle shall be chained.

Accident Reporting

If you are involved in an accident, stop immediately. You are legally required to remain at the scene of the accident, give aid to the injured if aid is needed or requested, and provide information to law officers as required. You are no longer legally required to file a Civilian Collision Report unless the investigating officer advises you otherwise at the scene of the accident. You do, however, have the option of filing a Civilian Collision Report. If you elect to file the report, you have four days to file the report with the local city, county, or state police authority.

Vehicle Size and Weight, Credentials, and Safety

The Commercial Vehicle Division of the Washington State Patrol (WSP) has the responsibility to enforce state law relative to the operation of commercial vehicles, including: size, weight, licensing, hazardous materials, equipment inspection, and the inspection of equipment at accident scenes involving commercial vehicles.

WSP has vehicle size and weight enforcement jurisdiction over all highways in the state, including those in urban areas. WSP operates five ports of entry with fixed scales, 55 other fixed scale sites, four plug and run sites, and seven other weigh station locations, which are used with portable trailer or wheel load scales. In addition, eight of the fixed scale sites are equipped with high-speed main line weigh-in-motion and the Commercial Vehicle Information System Network (CVISN) used for sorting and bypassing safe and legal vehicles.

The term CVISN (www.wsdot.wa.gov/commercialvehicle) refers to the collection of information and communication systems owned and operated by the Federal Highway Administration, states, motor carriers, and other stakeholders. An integral part in making CVISN work is the use of a transponder. The transponder identifies a truck to a system that automatically checks safety ratings, credentials, and weight while the truck travels at freeway speeds. If all of the checks are satisfactory, the driver will receive electronic notification to bypass the weigh station. Of course, the bypass is subject to a random pull-in rate of about 5 percent.

The transponders used in the CVISN system are the most commonly used transponders on the market today. They will work in the pre-clearance systems in the following areas: Washington, Idaho, Utah, British Columbia, the Oregon Green Light System, and NORPASS states throughout the country. These transponders are also compatible with the Help, Inc., system. However, you must register your transponder with Help, Inc., before it will work in their system.

How to Get a Transponder

If you are a motor carrier traveling within or through the state of **Washington** and would like to obtain a transponder, call the Washington State Department of Transportation (WSDOT) at **1-888-877-8567** and ask for an application. You will be asked to (1) submit a completed application, (2) provide a copy of your cab card, and (3) remit a check to WSDOT reimbursing the state for the cost of the transponder. Once the application has been accepted, you will receive the transponder(s) in the mail. The transponder becomes your property and the rights to the transponder will revert to your company. Transponder applications are available at **www.wsdot.wa.gov/commercialvehicle**

How Does Electronic Screening Work

Weigh-in-Motion (WIM) scales imbedded in the roadway about a half mile ahead of the weigh station and Automatic Vehicle Identification (AVI) devices communicate electronically to verify each transponder-equipped truck's weight, size, carrier registration, and safety record. Within seconds, the computer at the weigh station will send a return signal to the transponder mounted within the truck's cab indicating whether the driver is cleared to bypass the weigh station. That indicator signal will cause a green light to be displayed on the transponder if everything is proper. If something wrong is discovered, the signal will cause a red light to appear on the transponder and the driver must pull into the weigh station for a closer scrutiny.

Approximately 5 percent of the trucks will randomly be given a red light and required to stop at the weigh station. This process has been installed to provide for manual checks to the automated system.

Self Tarping Systems

The self tarping system is an aftermarket system that encloses the cargo area of a flatbed semi-trailer. It is designed to be stowed accordion style at either end of the trailer during loading, and then rolled out and locked into place. The system protects the cargo from adverse weather conditions and road debris, while sparing drivers the difficulty and danger of climbing onto the trailer to tie down conventional tarpaulins.

The design of the self tarping system requires that some equipment be added to each side of the flatbed, extending the width of the vehicle beyond 102 inches.

Washington State will treat equipment like the self tarping system as width-exclusive under the following conditions:

- 1. There is allowed a "front-end structure" and "rear-end structure" used to provide structural support for the tarping system, not to exceed 108 inches in width. There is also allowed a rail system that will not exceed 3 inches beyond either side of the vehicle. The front-end structure" *may not* double as the bulkhead used to prevent load shifting or penetration or crushing of the drivers compartment as required by 49 CFR 393.106, which is limited to 102 inches in width.
- 2. When the vehicle is in operation, no component of the tarping system may extend laterally more than 3 inches beyond the cargo-carrying portion of the vehicle.
- 3. No portion of the load may be carried, braced, or otherwise supported by any component of the tarping system. The load must be confined to the legal width of the trailer.

Transportation of Farm Implements and Agricultural Hazardous Materials

Hazardous Materials Transportation

The Hazardous Materials Regulations (HMR) set forth requirements that you must follow if you ship or transport a hazardous materials, interstate or intrastate, in the course of your business.

Many fertilizers, pesticides, soil amendments, and fuels in farming are hazardous materials. If you transport a hazardous material on a public road in the course of your business, the HMR apply to you.

Agricultural Products

Agricultural products are defined as hazardous materials used to support farming operations, such as fertilizer, pesticide, soil amendment or fuel, but limited to:

- Flammable and non-flammable gases (Class 2)
- Flammable or combustible liquids (Class 3)
- Corrosive materials (Class 8)
- Miscellaneous hazardous materials (Class 9)
- Oxidizers (Division 5.1)
- Poisons (Division 6.1)
- Consumer commodities (ORM-D)

Transporting Agricultural Hazardous Material Products Between Fields of Your Own Farm

If you are a farmer transporting agricultural products other than gases (Class 2) between fields of the same farm using local roads, you need not comply with any of the requirements in the HMR. The agricultural products must be for your own farm.

Transporting Agricultural Hazardous Material Products to or From Your Farm

If you are a farmer transporting agricultural products to or from a farm, within 150 miles of the farm, you must comply with hazard communications (such as shipping papers and placarding) and incident reporting requirements of the HMR. However, you need not comply with the emergency response and training requirements in the HMR.

You may use this exception only if:

- You are transporting no more than 502 gallons of a liquid or gas agricultural product or 5,070 pounds of a solid agricultural product.
- You are transporting no more than 16,094 pounds of ammonium nitrate fertilizer in a bulk container and the ammonium nitrate is an oxidizer, Packing Group III.
- You are a farmer who is an intrastate private motor carrier.

Other exceptions applying to farmers may be found in: 173.315 (m) nurse tanks, 173.8 liquid petroleum products, and 173.6 Materials of Trade.

Note: The retailer is responsible for providing shipping papers and placards when these are required.

Prorate and Fuel Tax Services

(Department of Licensing)

General Information

State of Washington Department of Licensing Prorate and Fuel Tax Services

Phone: (360) 664-1858 or 664-1868 Fax: (260) 570-7829 or 586-5905

Olympia Headquarters

Office Hours: 8:00 a.m. to 5:00 p.m.

Monday through Friday

Mailing Address: P.O. Box 9036

Olympia, WA 98507-9036

Physical Address: 2424 Bristol Court SW

Olympia, WA 98502

Days Closed

January 1 (New Year's Day)
3rd Monday in January (M. L. King, Jr's Birthday)
3rd Monday in February (President's Day)
Last Monday in May (Memorial Day)
July 4 (Independence Day)
1st Monday in September (Labor Day)
November 11 (Veteran's Day)
4th Thursday in November (Thanksgiving Day)
The Day after Thanksgiving Day
December 25 (Christmas Day)

Field Office Locations

Office Hours: 8:30 a.m. to 4:30 p.m.

Monday through Friday

(Vancouver office opens at 9:30 a.m. on Thursdays)

Olympia Counter

2424 Bristol Court SW Olympia, WA 98502 (360) 664-1895

Spokane Counter

6517 N Lidgerwood Street Spokane, WA 99208-5390

(509) 482-3611

Vancouver Counter

1301 NE 136th Avenue Vancouver, WA 98663 (360) 260-6396

Services provided at counter areas: new accounts, vehicle additions, deletions, gross weight increases/ decreases, added jurisdiction transactions, and limited renewal processing. *You may also apply for an IFTA license at these locations*.

International Fuel Tax Agreement

If you operate a Washington licensed commercial motor vehicle weighing 26,001 pounds or more having three or more axles, regardless of weight, and you travel in two or more states, you are eligible to use the International Fuel Tax Agreement (IFTA) program.

This agreement allows you to file only one tax return with us and we will distribute the monies owed to the other IFTA member states and Canadian provinces that you operate in. This applies to all fuel taxes, including diesel, gasoline, propane, and gasohol. The IFTA license is good for one calendar year and expires on the 31st of December. There is no bond or first time application fee required for this license. If you have paid your required taxes through the 3rd quarter of the fuel tax year, a new IFTA card will be sent to you, good for the following year.

Advantages of the IFTA include:

- A single fuel tax license and decal that lets your vehicles travel in all other IFTA states and Canadian provinces.
- A single fuel tax report giving you detailed information about your dealings in other IFTA states.
- The likelihood of fewer reviews by your base state IFTA representatives.

License your vehicles through Washington IFTA if:

- Your vehicle is registered in Washington State and you operate your vehicle outside of the state some of the time.
- Your vehicle GVW is 26,001 or more.
- Your vehicle has three or more axles regardless of weight.
- Your vehicle operates in two or more IFTA states.
- You keep your vehicle records and operational control of your vehicle here in Washington or you can make your records available for review.

Washington-based trucks that leave the state, must obtain fuel permits or have IFTA documents prior to re-entering the state.

Application/Licensing

To get an IFTA application, call the Fuel Tax Section in Olympia at (360) 664-1868. To receive your IFTA license and decals, complete an application form along with \$10.00 per set of IFTA decals and send it to:

Department of Licensing Fuel Tax Section P.O. Box 9228 Olympia, WA 98507-9228

The application requests general information about you and your operation outside Washington. All entries will be examined for correctness. If more information is required, the applicant is contacted. If the application is correct, you will be issued your IFTA license and enough decals for your vehicles.

Record Requirements

- You must keep records to be able to certify the correctness of the information on your quarterly tax report.
- Keep your records for at least four years from the time you filed them, or the tax due date, whichever is later. Keep the records available for possible audit by any IFTA jurisdiction.
- You can use on-board electric recording devices in place of, or in addition to, hand-written records of your trips. If you use electronic devices, they must meet the standards outlined in the IFTA Procedures Manual.

Reporting Requirements

You must file a report every calendar quarter with your base state. You have to pay your quarterly fuel tax for all states or Canadian provinces with one check made out to your base state and included with your return. The report is to be for the previous quarter. You are required to file even if you did not operate during the quarter you are filing for.

Credit and Refunds

You will receive credit or a refund for any fuel used outside of the state where the fuel was purchased. This credit is applied to fuel tax liabilities incurred in other IFTA jurisdictions. Remaining credits will be used against any payments you may owe in future reporting quarters until your credit is used up, or eight quarters have gone by, whichever is sooner. You can request a cash refund of any credits from your base state.

License Revocations

A fuel license will be revoked by Fuel Tax Services when a tax return or fuel taxes owed are not submitted in a timely manner. If you hold more than one fuel license in Washington, all licenses are revoked when one license is revoked. A Notice of Intent to Revoke is sent shortly after the due date of the required tax return which advises the licensee that they have twenty (20) days to submit the information. To reinstate a revoked fuel license, all tax returns up to and including the revocation date must be submitted with a new application, payment for unpaid taxes, and a \$100 penalty. Under the International Fuel Tax Agreement (IFTA), revocation of an IFTA license revokes fuel use authority in all member states.

International Registration Plan

The International Registration Plan (IRP) is an agreement between the states and most Canadian provinces that allows you to pay one state, receive one plate, and be legally registered in the other states, D.C., and Canadian provinces that currently are members.

Apportioned Registration

Apportioned registration is a method of licensing a fleet of commercial vehicles operating in more than one jurisdiction. Fees collected are divided up or "prorated" among the member states.

IRP Plate (Apportioned)

IRP Plate (Apportioned Combination)

IRP Plate (Combination)

Eligibility to Use Apportioned Registration

Vehicles are eligible for apportionment under the provisions of the International Registration Plan if they meet the following criteria:

- Intended for use in two or more jurisdictions.
- Is a power unit having two axles and a gross vehicle or registered gross vehicle weight in excess of 26,001 pounds.
- Is used in combination, when the weight exceeds 26,001 pounds gross vehicle weight.
- Is a power unit having three or more axles with a registered gross vehicle weight of at least 14,000 pounds.

Reciprocity

Washington has various reciprocity agreements with other states and Canadian provinces which authorize the movement of commercial vehicles licensed in jurisdictions which do not participate in the International Registration Plan or which operate using specialized plates. The terms of each reciprocity agreement vary. It is advisable to contact the Prorate and Fuel Tax Services office at (360) 664-1841 or 664-1820 to determine if your vehicle is eligible for reciprocity.

Application/Licensing

You can get additional information and a license application by contacting the Department of Licensing or visiting the IRP Offices in Olympia, Spokane, and Vancouver.

Department of Licensing

IRP Section P.O. Box 9036 Olympia, WA 98504 (360) 664-1858

Spokane Counter

6517 N Lidgerwood Street Spokane, WA 99208-5390 (509) 482-3611

Olympia Counter

2424 Bristol Court SW Olympia, WA 98502 (360) 664-1895

Vancouver Counter

1301 NE 136th Avenue Vancouver, WA 98684 (360) 260-6396

Office hours are from 8:00 a.m. to 5:00 p.m., Monday through Friday Counter hours are from 8:30 a.m. to 4:30 p.m., Monday through Friday

Note: On Thursday, the counter hours are 9:30 a.m. to 4:30 p.m. for Vancouver ONLY.

Record Keeping Requirements

The International Fuel Tax Agreement (IFTA) and International Registration Plan (IRP) agreements identify specific records required to be maintained by licensees and registrants. These requirements are also addressed in the revised Code of Washington (RCW) and Washington Administrative Code (WAC). Licensees and registrants are required to maintain detailed mileage (for kilometer) distance records for each individual vehicle or a period of four years from the due date, filing date of fuel tax returns, or registration applications. These records must substantiate the information filed with the department and are subject to review through audit. An appropriate record keeping system must maintain monthly distance and fuel summaries by vehicle with detailed supporting records meeting the following requirements:

- 1. Registrant's name.
- 2. Vehicle fleet number.
- 3. Unit number or vehicle identification number.
- 4. Beginning and end odometer (or hub odometer) reading of each trip.
- 5. Date of trip (starting and ending).
- 6. Trip origin, and all pick-up locations, fueling locations, and delivery destinations.
- 7. Routes of travel.
- 8. Distance by jurisdiction.
- 9. Total trip distance.
- 10. Original fuel invoice (including date, customer and seller name, gallons, fuel type, tax paid, and vehicle number).

In addition, Driver's Daily Logs are prescribed by the Federal Motor Carrier Safety Administration (FMCSA) are required to be maintained for a period of four years from the due date or date of filing fuel tax returns and registration applications if they represent the source documentation of operations (RCW 46.87.310).

Be advised that the departments record keeping requirements and record retention periods may differ from other regulatory agencies. Missing or inadequate records may result in audit adjustments to fuel consumption, tax-paid credits, or jurisdictional distance.

If you have questions concerning record keeping, please contact the IFTA unit at (360) 664-1868 or IRP unit at (360) 664-1858.

Cab Cards

A cab card will be issued to you. This is your new registration and replaces the original Washington registration. Your cab card will have all of the jurisdictions you can legally operate displayed on it. Your cab card must be in the vehicle that is described on the cab card.

Trip Permits

Vehicle trip permits may be purchased for \$20.00 per permit. The permit will allow you to operate a maximum legal weight for a single vehicle up to 40,000 pounds and a combination vehicle up to 80,000 pounds, for a period of three consecutive days. A trip permit will be required for each separate unlicensed vehicle. No more than three trip permits per unit may be used within any consecutive 30-day period. Trip permits must be properly filled out prior to moving the vehicle(s).

Operators of vehicles with a gross weight of 26,001 pounds or more must have an IFTA license or a special fuel trip permit to enter this state. The cost for each permit issued is \$25.00.

Each permit is valid for three consecutive days beginning and ending on the dates specified on the face of the permit. Every permit shall identify, as DOL may require, the vehicle for which it is issued and shall be completed in its entirety, signed, and dated before operation of the vehicle on any public highway. Any correction such as the date, license number, or VIN number invalidates the permit.

PRISM Program

PRISM is a cooperative federal/state safety program designed to identify motor carriers with deficient safety records, and to tie a motor carrier's safety fitness to the ability to register their trucks. PRISM links the Federal Motor Carrier Safety Administration's (FMCSA) safety information with the state's motor vehicle registration process to achieve two purposes:

- To determine the motor carrier's safety fitness prior to issuing a registration plate; and
- To motivate the unsafe carrier to improve its safety performance through an improvement process and, where necessary, the application of registration sanctions.

The PRISM program includes two major processes — the commercial Vehicle Registration process (IRP registration) and enforcement that work in parallel to identify motor carriers and to hold them responsible for the safety of their operations. The performance of unsafe carriers is improved through a comprehensive system of identification, education, awareness, data gathering, safety monitoring, and treatment.

Section Three

Commercial Driver's License Standards, Requirements, and Penalties

(49 CFR, Part 383)

The Commercial Motor Vehicle Safety Act of 1986 requires all states to meet the same minimum standards for testing and licensing commercial drivers. All drivers of commercial vehicles throughout the United States are required to have a Commercial Driver's License (CDL).

Only professional drivers will receive and keep the CDL. It takes special skills and a professional attitude to safely operate large trucks and buses. Your CDL is proof of your professional skills and attitude. Welcome to the ranks of professional drivers.

Washington State began to issue Commercial Driver's Licenses on October 3, 1989. The CDL replaced the intermediate and combination classified endorsements of the classified license program. Intermediate/Combination Endorsed Licenses are not valid. See Appendix 1 to see the type of CDL you will need if you operate a commercial vehicle.

The purpose of RCW 46.25, Uniform Commercial Driver's License Act, and WAC 308-100 and Part 383 of the Federal Motor Carrier Safety Regulations, is to help reduce or prevent commercial vehicle accidents, fatalities, and injuries by:

- Requiring that no driver has more than one driver's license.
- Disqualifying drivers who have committed certain serious traffic violations, or other specified offenses.
- Strengthening licensing and testing standards.

Commercial Driver's License Information System (CDLIS)

The CDLIS enables the states to exchange information about the driving records and driver's licenses of commercial vehicle operators. This helps assure that only one license is issued to a driver and that disqualified drivers are prevented from obtaining a CDL. Employers have ready access to the commercial driving status of their drivers through their state's licensing agency.

All commercial vehicle operators must have a CDL and current medical examination certification on their person while operating a commercial vehicle. If you are not a resident of Washington State and operate a commercial motor vehicle within the borders of Washington State, you must have a valid driver's license issued by your base state along with your current medical certification. Canadian carriers need not carry medical certification.

You need a CDL if you operate any of the following vehicles:

- All single vehicles with a gross weight rating (GVWR) of 26,001 pounds or more.
- All trailers with a GVWR of 10,001 pounds or more, if the gross weight rating of the combined vehicle(s) is 26,001 pounds or more.
- All vehicles designed to transport 16 or more persons (including the driver).

These vehicles are divided into three classes: A, B, and C. The higher class CDL allows you to drive vehicles in any of the lower classes, provided you have the correct endorsements.

Occasional drivers are also required to apply for a CDL and all appropriate endorsements. *For example:* mechanics or truck sales people who test drive on a public roadway. In addition to a CDL, drivers may need special endorsements if they:

- Drive vehicles carrying passengers (buses).
- Pull double or triple trailers (see following section on exemptions).
- Drive tank vehicles (see following section on exemptions).
- Haul placarded hazardous materials (see following section on exemptions).

The following endorsements/restrictions require tests.

CDL Endorsements

(RCW 46.25.080)

- **T:** Double/Triple Trailers Endorsement required for drivers pulling sets of double or triple trailers.
- **N:** Tank Vehicle Endorsement required for drivers of vehicles carrying liquids or liquid gases in portable or fixed tanks. Not required for portable tanks with a rated capacity of under one thousand (1,000) gallons.
- **H:** Hazardous Materials Endorsement required for drivers of vehicles carrying hazardous materials which require the vehicle to be marked with a placard.
- **P1:** Authorizes driving all passenger vehicles designed to carry 16 or more passengers to include the driver.
- **P2:** Authorizes driving vehicles with a GVWR of 26,000 pounds or less designed to carry 16 or more passengers to include the driver.
- **X:** Combines both tank and hazardous material endorsements.
- S: School bus.

CDL Required

CDL NOT Required (15 passengers or less)

CDL Restriction(s)

K: Drivers of commercial vehicles with air brakes must pass the required tests on air brakes. Drivers who do not take and pass these tests are restricted on their CDL to operate only non-air brake equipped commercial vehicles.

Who Does Not Need a CDL?

The law exempts certain groups of drivers from the requirement to obtain a CDL (RCW 46.25.050):

- Farmers transporting farm equipment, supplies, or products to or from a farm in a farm vehicle are exempted, provided the vehicle is operated by a farmer or farm employee, as long as they stay within 150 miles from the farm. (Products include Christmas trees or wood products transported by vehicles 40,000 pounds GVW or less.)
- **Firefighters/law enforcement personnel** operating equipment are exempted, provided they have completed the Emergency Vehicle Accident Prevention Program (EVAP) and they carry a card certifying completion.
- **Recreational vehicle operators** are exempted when driving RVs for non-commercial purposes. This includes two-axle rental trucks (WAC 308-100-210), and horse trailers (RCW 46.25.050).
- **Certain military vehicle drivers** operating under a military license issued by the appropriate service and only while operating appropriate military vehicles.

Procedures for Obtaining a CDL or CDL Instruction Permit (CDIP)

To get a CDL or CDL instruction permit (CDIP), you are required to be at least 18 years of age and have a valid Washington State driver's license. You may apply for both at the same time at any state Licensing Services Office (LSO). **Note:** Employers may impose additional standards and/or higher minimum age requirements.

Bring the following items to the licensing office:

- Your current driver's license.
- Your social security card issued by the Social Security Administration. Your social security number is required for identification purposes. This is a *mandatory requirement*. 49 USC 31308, RCW 46.25.070.

A CDIP may be issued to an individual who holds a Washington automobile driver's license. The holder of a CDIP may drive a commercial motor vehicle on a highway only when accompanied by the holder of a commercial driver's license, valid for the type of vehicle driven, who occupies a seat beside the individual, for the purpose of giving instruction in driving the commercial motor vehicle.

- The CDIP is valid for six months, and may be renewed one time only.
- The CDIP fee is \$10.00.

Testing

Both the knowledge (written) and skill (driving) tests are required to receive a CDL. A knowledge test is required for:

- The class of vehicle.
- Each endorsement, and/or restriction.

The skill test consists of a pre-trip inspection and a road test, and takes up to two hours. You will need to provide a vehicle appropriate to the class of license you apply for, including a bus (designed to carry 16 or more persons including the driver) if applying for a passenger endorsement.

After a CDL is issued, adding a passenger endorsement, upgrading a license, or removing a restriction requires both knowledge and skills tests and applicable fees.

All drivers who surrender the CDL or any endorsement will be required to pay all applicable fees and retake both the knowledge and skill tests to obtain a new CDL.

Fees

To obtain a CDL, you will need to pay the appropriate fees:

- \$10 testing fee for the knowledge test.
- \$30 Commercial Driver's License and issuance fee.
- \$75 maximum per skills test fee.

This charge is for one test only, retests will cost up to an additional \$75. These fees are in addition to any fees for your basic driver's license.

Renewal/Upgrade

When applying for a renewal or upgrade of a CDL, applicants shall:

- Provide any updated information.
- Pass a written hazardous materials test if wishing to retain or upgrade a hazardous materials endorsement.
- Complete any additional testing requirements for an upgrade.

CDL Disqualification

You are required to notify your employer if your license is suspended, revoked, or canceled, or if you are disqualified from operating a commercial vehicle. You have *one* day from the day of notification to do this.

There is no Occupational Driver's License available for commercial motor vehicle drivers, regardless if conviction is for offense in a private or commercial motor vehicle. You must notify your employer, in writing, of all traffic convictions within 30 days. This includes those in your private automobile as well as a commercial vehicle.

You must notify the Department of Licensing, in writing, of all out-of-state convictions within 30 days of the conviction. Write to:

Department of Licensing P.O. Box 9030 Olympia, WA 98507-9030 If your license is suspended or revoked, your commercial driving privilege is invalid. After your suspension or revocation, to reinstate you must file proof of financial responsibility with the Department of Licensing. Your filing must include a letter from your employer's insurance company indicating that you are insured to operate commercial vehicles.

Serious Traffic Violations

Serious traffic violations include:

- Driving a CMV without a CDL or in the driver's possession.
- Driving a CMV without the proper class of CDL or endorsements.
- Excessive speed (15 mph over posted limit).
- Reckless driving.
- Negligent driving.
- Improper lane changes.
- Following too closely.
- Violation of a state or local law relating to motor vehicle traffic control, other than a parking violation, in connection with an accident or collision resulting in a death to any person.

A driver is disqualified for one year for a first-time conviction of the following offenses while operating a commercial vehicle:

- Driving under the influence of alcohol or any controlled substance.
- Driving with an alcohol concentration of .04 percent or more.
- Leaving the scene of an accident.
- Refusing to take an alcohol test as required by a state.
- Using the vehicle to commit a felony.
- Driving a CMV when suspended or revoked.
- Causing a fatality through the negligent operation of a CMV.

If convicted of *any of the above* while operating a vehicle placarded for hazardous materials, the disqualification increases to three years.

- A second conviction of the above offense will result in disqualification for life. The second conviction may be for the same or a different offense.
- Using a commercial vehicle in the making, selling, or distribution of controlled substances results in a lifetime disqualification.
- If you hold a CDL, you have given consent to taking a breath or blood test to determine alcohol content as prescribed by Washington Law. Consent is implied by driving a commercial motor vehicle (49 CFR part 383.72).

If *any* level of alcohol is detected, law enforcement can place a commercial driver out-of-service for 24 hours. It is illegal to operate a commercial vehicle with *any* alcohol in your system.

If the driver is convicted of operating a CMV in violation of a federal, state, or local law regarding failure to stop at railroad crossings:

- The driver is not required to always stop, but fails to slow down and check that railroad tracks are clear of an approaching train.
- The driver is not required to always stop, but fails to stop before reaching the crossing, if the tracks are not clear.
- The driver is always required to stop, but fails to stop before driving onto the crossing.
- The driver fails to have sufficient space to drive completely through the crossing without stopping.
- The driver fails to obey a traffic control device or the directions of an enforcement official at the crossing.
- The driver fails to negotiate a crossing because of insufficient undercarriage clearance.

Driver's Medical Certificate

A completed physical examination form or Department of Transportation physical card filled out by a licensed medical examiner. The physical is valid for no more than two years from the date of examination. Date of expiration must be reflected on the Medical Certificate.

Medical Waiver Procedures

All commercial drivers must meet minimum medical standards as established by federal and state rules and regulations 49 CFR parts 391.41 - 391.49 and WAC 446-65-020.

Interstate Waivers

Interstate waivers are processed by the Federal Motor Carrier Safety Administration. Drivers who are missing or have the impaired use of a foot, leg, hand, or arm, vision, and diabetic also may be eligible to apply for an interstate waiver. To apply, contact:

Federal Motor Carrier Safety Administration 502 Evergreen Plaza 711 S Capital Way Olympia, WA 98501

Phone: (360) 753-9875

Intrastate Waivers

The Washington Utilities and Transportation Commission (WUTC) and the Washington State Patrol (WSP) have adopted the same medical standards for all Washington licensed drivers who do not meet minimum medical standards to apply to the Department of Licensing for an intrastate medical waiver.

Prior to applying for a CDL, drivers who need an intrastate medical waiver must send the following information to the Department of Licensing in Olympia:

- A letter of application for a waiver. The letter must be submitted jointly by the person seeking
 a waiver of the physical disqualification (driver applicant) and by the motor carrier that will be
 employing the driver applicant. If the driver is self-employed or currently unemployed, a letter
 from the motor carrier will not be necessary. The letter must contain the name and address of
 the motor carrier (employer), the name, license number and resident address of the driver, and
 a description of the driver applicant's impairment for which the waiver is being requested.
- A copy of the current physical examination.
- A medical evaluation summary completed by a board qualified or board certified physician or
 orthopedic surgeon. The medical evaluation summary must include a statement by the physician
 on how and why the impairment interferes with the ability of the driver to perform normal tasks
 associated with operating a commercial motor vehicle, and an assessment and medical opinion
 of whether the condition will likely remain medically stable for at least two years. Mail this
 information to:

CDL Medical Waiver Program P.O. Box 9030 Olympia, WA 98507-9030

Phone: (360) 902-3860 Fax: (360) 586-8351 Requests for intrastate medical waivers are processed promptly and mailed to the driver. After receipt of the medical waiver, application can be made for a CDL license. The medical waiver and the CDL license must be carried at all times when operating a commercial vehicle.

Licenses of Persons Serving in Armed Forces to Remain in Force — Duration

(RCW 46.20.027)

If you are living outside of the state of Washington and serving in the armed forces of the United States, your license is good as long as it is not suspended, revoked, or canceled. It is valid for 90 days after separation from the armed forces of the United States.

National Driver Register File Check — Federal Privacy Act of 1974

(Public Law 93-579)

The National Driver Register (NDR) contains only a listing of names and related identification, provided by state driver licensing officials, of those drivers whose driver's licenses have been canceled, denied, revoked, or suspended or who have been convicted of certain serious traffic violations. The NDR does not contain a list of other drivers. If you have not had a driver's license canceled, denied, revoked, or suspended, or have not been convicted of serious traffic violations, you would not be listed in the NDR. Every individual is entitled, however, to request a check of the NDR records to determine whether they appear on the NDR file. The NDR will respond to every valid NDR inquiry.

The record content for those persons who are listed in the NDR files is limited to identification of the state(s) which have taken action to cancel, deny, revoke, or suspend, or have records of conviction of serious traffic violations. Any specific information about the driver history, or a request for the entire driver history, may be obtained only from the state(s) where the detailed information is recorded. The state(s) maintaining records are the (only) contacts able to correct records in error, and the NDR will correct records when so advised by a state indicating that a report previously made to the NDR is in error.

If the NDR has a record on you, the full record will be copied and sent to you including any older records which may have contained a reason for license cancellation, denial, revocation, or suspension. In addition, if such information has been disclosed by the NDR, the recipient will also be identified.

The name and address of the state driver licensing official will be provided for each state listed as having reported information on you to the NDR.

Requests for NDR Record Checks

Any person may ask to know whether there is an NDR record on him/her and may obtain a copy of the record if one exists. Complete the front side of the form in Appendix 7 on page 80, have your signature (or your mark as witnessed) notarized, and mail the completed form to the address given on the form.

The NDR response will be mailed to the mailing address shown, but incomplete or illegible inquiries will not be processed. All inquiries will be acknowledged if a return address is readable. Forms which are not notarized will not be processed.

eSNOOPI

Motor Carrier Services is offering, to approved carriers, the ability of self-issuing permits through the eSNOOPI permitting program. This new web based program will allow companies to issue themselves oversize permits with transactions completed by Visa or MasterCard only. When authorized, self-issuers will be given a login and password to gain secure access to the eSNOOPI permitting program on the Internet.

Initially, self-issuing companies will be limited to certain types of permits. These permits will include the following:

- Department of Licensing trip/fuel permits (3 day).
- Single trailer permits allowing for a divisible load carried on a semi-trailer up to 56 feet (30 day/annual).
- Double trailer permit allowing for a divisible load carried on a set of double trailers up to 68 feet (30 day/annual).
- 61-foot non-divisible load on a semi-trailer with a rear overhang not to exceed 15 feet (30 day/annual).
- Non-divisible dimensional permits 14 feet wide, 15 feet high, and/or 125 feet overall length minus power unit (30 day/annual).
- Monthly manufactured home permits with a dimension envelope of 15 feet high, 15 feet wide (including a 12-inch eave) and trailer length not to exceed 75 feet.
- Hay bales.
- Log tolerance.
- Empty apple bins.

Weight permits will not be considered for self-issuing, but may be considered in the future after careful evaluation of the program.

Self-issuing companies will have the ability to access reports of permits issued from their office only. Issuing permits will be available through the Internet 24 hours a day, 7 days a week. It will be the responsibility of the carrier to check road restrictions on the Commercial Vehicle Services website prior to moving (www.wsdot.wa.gov/commercialvehicle). It is also the responsibility of the carrier to know and follow the rules and regulations related to oversize/overweight loads. These rules and regulations can also be found on the Motor Carrier Services website.

Section Four

Administration of Vehicle Size and Weight

Vehicle size and weight, including the special motor vehicle permit program, is administered by the Commercial Vehicle Services Office of WSDOT. The administrative office is located in Olympia, but special motor vehicle permits may be issued by authorized employees and agents of WSDOT located throughout the state. Correspondence or questions relating to special motor vehicle permits should be directed to:

Washington State Department of Transportation Commercial Vehicle Services/Motor Carrier Services 7345 Linderson Way SW P.O. Box 47367 Olympia, WA 98504-7637

Phone: (360) 704-6340 Fax: (360) 704-6350

Home Page: www.wsdot.wa.gov/commercialvehicle

Ordering Special Motor Vehicle Permits

Many WSDOT offices issue special motor vehicle permits, also referred to as overweight and oversize permits. In some cases, WSDOT has contracts with permit agents, most of whom operate small businesses within the state. For locations and phone numbers, please refer to page 54. All permit applications must be in writing.

To help carriers obtain permits, some offices provide permits by facsimile (fax).

Agents may charge a fee for transmitting the permit to the customer.

Permits may be charged using VISA or MasterCard at all WSDOT offices.

Vehicles that are over dimensional or overweight and within the permit limits must have a permit prior to entering the state. **Permits are no longer available at the Ports of Entry.** Permits must be acquired through the Department of Transportation or their agents Monday through Friday from 7:00 a.m. to 5:00 p.m. Some agents operate evenings and weekends. Refer to the list of agents on the CVS website at **www.wsdot.wa.gov/commercialvehicle**.

All qualifying overlegal vehicles must have permits prior to moving within or upon entering the state.

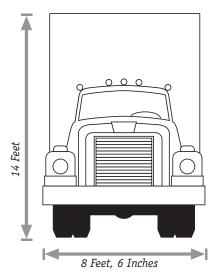

Highway Movements Requiring a Permit

Movements that exceed any of the following legal features may require a special permit, if eligible.

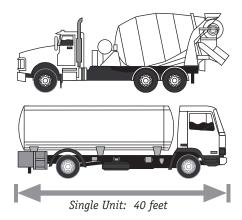

Legal Dimensions

Legal maximum **width** of a vehicle or load is 8 feet 6 inches. Vehicles/loads wider than this need permits. Overwidth vehicles/loads are subject to route curfews. Vehicle loads over 16 feet wide must submit a request to the MCS office for approval to move.

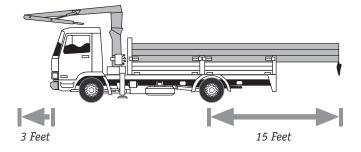

Legal maximum **height** is 14 feet. Vehicles or loads higher than this need a permit. Vehicles/non-divisible loads higher than 14 feet 6 inches must be accompanied by a front escort, with a height pole on all Washington highways (WAC 468-38-100(h)). Loads over 16 feet high must submit a request to the MCS office for approval to move.

The legal **length** of a single unit, i.e., dump truck, U-Haul van, concrete pumper, etc., is 40 feet. There are permits for front and rear overhang on these units; however, there are limitations to the amount of overhang a vehicle can have and still be able to travel during commuter and curfew hours.

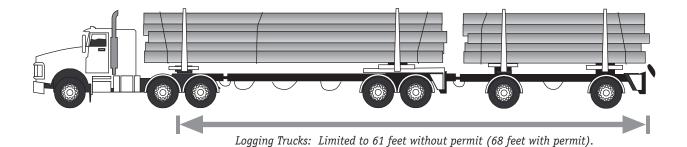

Legal Overhangs: Front overhang is 3 feet from the front of the normal bumper line. Rear overhang is 15 feet measured from the center of the last axle.

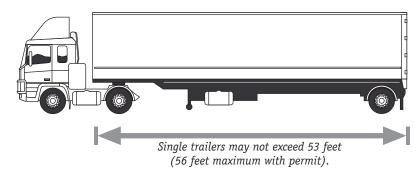

A **log truck and stinger-steered pole trailer** is limited to 75 feet in overall length, with or without load.

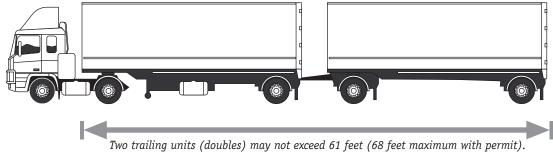

The log truck, pole-trailer, trailer combination, when loaded with two distinct loads of logs (as shown below), will be treated like a set of doubles for measurement purposes. Measurement will begin at the front of the first bunk and extend to the end of the second trailer or load, whichever is greater. Operation without permit is limited to 61 feet, and 68 feet with permit.

Washington State Commercial Vehicle Guide 2006-2007

Only trailer and load constitute regulated length unless the tractor also carries freight. Single trailers may not exceed 53 feet (56 feet maximum with permit). The legal length of combination vehicles may vary. For example, truck and trailer combinations may not exceed 75 feet. Two trailing units (doubles) may not exceed 61 feet (68 feet maximum with permit).

Truck/trailer combination vehicles may not exceed 75 feet.

Legal Weights

Gross vehicle weight (GVW) for a vehicle or a vehicle combination is determined by an overlapping set of three criteria: tire size, axle weight, and the weight table (Appendix 4). The lesser of any one of the criteria will govern the weight of any axle or axle group. For help in determining the legal gross vehicle weight, call the Motor Carrier Services Office.

Legal Weight Maximums

Gross Vehicle Weight	105,500 pounds	
Single Axle	20,000 pounds	
Tandem Axle	34,000 pounds	
Two Tire Axle	500 pounds	per inch width,* except **
Steer Axle	600 pounds	per inch width

^{*}As marked by the manufacturer on the sidewall. Metric conversion to inches: divide metric size by 25.4 (i.e., $285 \div 25.4 = 11.22$ inches).

^{**}Fixed steer axles equipped with single tires are limited to 600 pounds per inch width. Other than the steer axle, axles carrying more than 10,000 pounds and equipped with single tires are limited to 500 pounds per inch width. For other exceptions, refer to RCW 46.44.042 Maximum Gross Weights – Axle and Tire Factors.

Legal Vehicles or Combinations

Auto or Boat Carriers (WAC 468-38-270(2))

— "Stinger steered" auto and boat carriers are allowed a 3-foot front overhang and a 4-foot rear overhang beyond the 75-foot limit that regular truck and trailer combinations are allowed, with a total length of 82 feet. Conventional fifth wheel (mounted above drive axles) carriers are allowed a 3-foot overhang and a 4-foot rear overhang beyond the 65-foot length limit, with a total length of 72 feet. These combinations are referred to as "specialized equipment."

To be considered specialized equipment, the power unit and trailer must both be designed to transport automobiles.

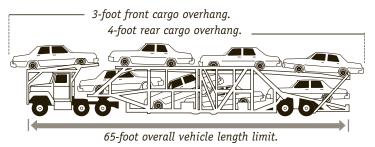

The tractor trailer configuration without modified tractor does not have an overall length or bonus overhangs. The configuration may have a trailing unit, with load, up to 56 feet with permit.

Stinger-Steered Auto Transporter Combination

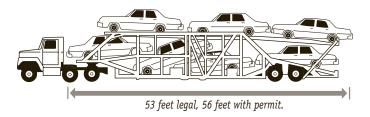

75-foot overall vehicle length limit.

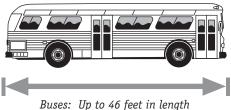

Conventional Automobile Transporter Combination

Tractor Trailer Combination With Automobiles

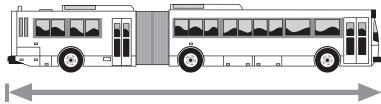

Buses (RCW 46.44.030) — Buses may be up to 46 feet in length; however, articulated buses may be as long as 61 feet.

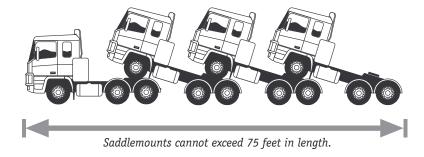

Saddlemounts (*RCW* 46.44.037) —

Articulated Buses: Up to 61 feet

A saddlemount configuration is made up of a tractor pulling up to three additional tractors in a "piggy back" arrangement. The configuration is allowed an overall length of 75 feet. A saddlemount with full mount (a fifth vehicle carried in full mount on the first or last vehicle) is allowed an

overall length up to 97 feet.

Washington State Commercial Vehicle Guide 2006-2007

Empty Trailers

Loads that are overdimensional, but not overweight, may be hauled under authority of a monthly permit that covers the dimensions. The "item" to be hauled on the combination will simply be referred to as "non-divisible load." This permit then covers any empty overdimensional trailer on the return trip.

Temporary Additional Tonnage

(RCW 46.44.095 and WAC 468-38-030)

In order to obtain temporary additional tonnage, a single unit must be licensed to a minimum 40,000 pounds and a combination must be licensed to a minimum 80,000 pounds. The rate is \$2.80 per day for every 2,000 pounds or fraction thereof up to the maximum legal weight allowed for the vehicle or vehicle combination as shown in the vehicle weight tables in Appendix 4. A minimum of five days must be purchased.

These permits are for loads meeting the weight table in Appendix 4. Only single units licensed to a minimum of 40,000 pounds or combinations licensed to a minimum of 80,000 pounds may be issued temporary additional tonnage. DOL trip permits may be used to increase the licensed gross weight up to 40,000 pounds for a single unit or 80,000 for a combination unit (RCW 46.16.160). Trip permits, when used, must cover the same period as the temporary additional tonnage permit.

Days	2000	4000	6000	8000	10000	12000	14000	16000	18000	20000	22000	24000	26000

Log Tolerance Permits

(RCW 46.44.047)

Unprocessed logs may be hauled in excess of weight limits imposed on other loads. The effect is that a log truck combination with a short wheel base may carry more weight than is allowed for other freight. The conditions under which a log tolerance permit may be used are:

- The combination is a *three-axle truck-tractor and two-axle pole trailer* (five-axle combination only) hauling unprocessed logs. (Four-axle truck-tractors with a drop axle *up or down are not eligible* for Log Tolerance Permits.)
- The entire combination gross weight cannot exceed **74,800** pounds.
- The gross weight on tandem axles cannot exceed **33,600** pounds.
- The distance between the first and fifth axle is no less than 37 feet.
- Local approval is required for use on city streets and county roads.
- The permit is not valid during emergency or severe emergency road restrictions.
- The permit commences on April 1 of one year and expires on March 31 of the following year.

Fees: \$50.00 for 1 year

\$37.50 if purchased after July 1 \$25.00 if purchased after October 1 \$12.50 if purchased after January 1

Variable Lift Axles

Lift axles that are used in conjunction with another axle or series of axles must meet these criteria:

- They must have a manufacturer's rating of 10,000 pounds.
- They must be self steering.
- They must be capable of being controlled from a location out of reach of the driver's compartment. The raising or lowering switch may be located in the cab.
- Lift axles must be engaged for all overweight loads.

However, four tire lift axles that are within 60 inches of a drive axle to create a tandem axle on the power unit only, need not be self steering, or two or more tire lift axles within 60 inches of a trailer axle need not be self steering.

Permits for Overdimensional Loads

Permits will only be issued to transport loads that are non-divisible. If the load or any part of the load can be reasonably reduced, it must be reduced.

Height

High loads must be carefully planned with an escort vehicle operator who is certified for Washington and is familiar with the area to be covered. Overheight loads often require detours on city streets and county roads, requiring their approval (see counties and cities list on page 55).

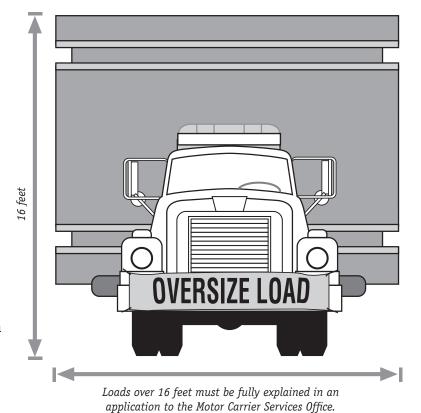

Loads over 16 feet high (superload) must be fully explained in a Request for Approval application to the Motor Carrier Services Office. The application process may require the inclusion of the need for the move, the route, the traffic control plan for the move, use of escort vehicles, and the dimensions of the combination and load.

A vehicle, or vehicle combination, hauling empty apple bins, or ranchers hauling hay from their own fields for use with their own livestock, may be issued a permit, for vehicle and load, not to exceed 15 feet high, measured from a level road bed.

Width

The route for overwidth loads must also be worked out with an escort vehicle operator familiar with the area. Overwidth loads may require detours.

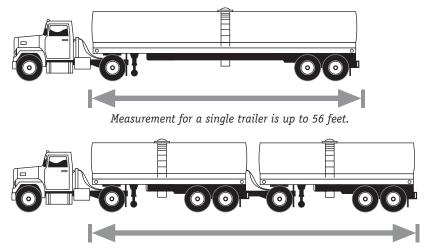

Loads over 16 feet wide (superload) must be fully explained in a Request for Approval application to the Motor Carrier Services Office. The application process may require the inclusion of the need for the move, the route, traffic control plan, escort vehicles, and the dimensions.

Washington State Commercial Vehicle Guide 2006-2007

Length

Measurement for a single trailer will be from the front of the trailer, or load, to the rear of the trailer, or load, whichever provides the greater distance up to 56 feet. Measurement for double trailers will be from the front of the first trailer, or load, to the end of the second trailer or load, whichever provides the greatest distance up to 68 feet. Measurements shall not include nonload carry devices designed for the safe and efficient operations of the semi-trailer or trailer; for example: external refrigeration unit, resilient bumper, and aerodynamic shells.

Measurement for a double trailer is up to 68 feet.

The following permits are exempt from some restrictions:

- Single trailer permits.
- Double trailers permits.
- 61-foot non-divisible load permits.
- Vehicles with a front overhang not more than 4 feet beyond the 3-foot legal front overhang.

Restrictions from which they are exempt are:

- Oversize load signs.
- Weekend, holidays, commuter curfew, and nighttime travel restriction.
- Mountain pass restrictions for oversize vehicles/loads.

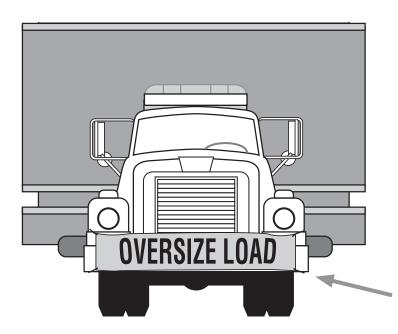

Load Restrictions

The load must be reduced to a practicable minimum, even if additional vehicles are required to transport the divided item. Loads created by welding, bolting, or tying will be construed as divisible, unless proven with good cause not to be divisible.

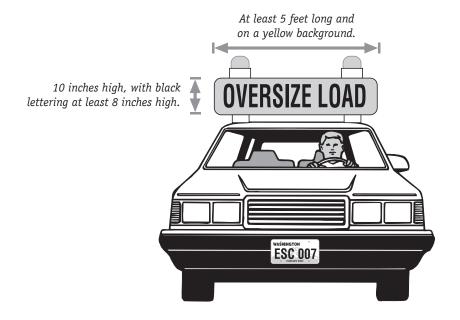

- Tractor and Semi-trailer or Full Trailer: Trailers in excess of 8 feet 6 inches wide or legal length of 53 feet, or the permitted length of 56 feet, shall not exceed the length or width of the load, unless the added dimension is necessary to spread the weight of load to protect the infrastructure.
- Tractor With Semi-trailer or Full Trailer: Combined trailer length, including space between trailers, may not exceed 61 feet. This combination is limited to non-divisible loads not to exceed 10 feet wide. Both trailers may carry non-divisible loads with the widest load contained on the first trailer. This configuration may not carry overheight, overlength, or overweight loads.

Oversize Load Signs

"OVERSIZE LOAD" signs are required on all overdimensional loads, except as provided for in WAC 468-38-075. Signs must be 7 feet long and 18 inches high with black lettering at least 10 inches high. Signs on escort vehicles must be at least 5 feet long, 10 inches high, with black lettering at least 8 inches high on a yellow background.

Signs must be 7 feet long and 18 inches high, with black lettering at least 10 inches high.

Permits for Oversize/Overweight Motor Vehicles

Non-divisible Loads

(WAC 468-38-050 and 468-38-070)

To qualify for a permit, the hauler must show that the load cannot reasonably be dismantled or disassembled. If the load can be reduced, even if that would require the use of additional vehicles, no special permit will be issued.

Permits for Overweight Loads

(RCW 46.44.091)

Permits may be issued if the load cannot reasonably be reduced and if WSDOT determines that the structures and roads over which the load is to travel can sustain the weight without undue stress.

Permits for heavy loads are not to exceed weight limits as follows:

- 600 pounds per inch of tire width.
- 22,000 pounds on a single axle.
- 43,000 pounds on a tandem axle. The weight allowed on any series of axles can be computed by the following formula:

Distance in Feet Between First and Last Axles in the Group

Weight Allowed (In Pounds)

7 feet to less than 10 feet, multiply	(Feet) x 6,500
10 feet to less than 30 feet	(Feet plus 20) x 2,200
30 feet or greater	(Feet plus 40) x 1,600

• Bridge restrictions may limit single axle capacities to 21,500 pounds or less on selected highways.

The lesser of any of these calculations will govern the capacity of any series of axles.

The weight on a single axle (at 600 pounds per inch tire width) may be up to 45,000 pounds if the equipment being moved has single pneumatic tires having a rim width of 20 inches or more and rim diameter of 24 inches or more, or dual pneumatic tires having a rim width of 16 inches or more and rim diameter of 24 inches or more. Specially designed vehicles manufactured and certified for special permits prior to July 1, 1975, may also be allowed.

Over Axle Permit (Overweight)

An over axle permit is for a load that falls within the legal gross weight, but axle(s) is over the legal weight limit. Over axle weight on an axle would be weight exceeding 20,000 pounds on a single axle and 34,000 pounds on a set of tandems. Tridem weight would depend on the measurement between the three axles. After determining the distance, check the vehicle weight table to see what the legal capacity would be. The price of the permit is calculated with the amount of weight over the legal axle weight and the number of miles to be traveled.

Manufactured Homes (Mobile Home)

(WAC 486-38-120)

A Manufactured Home (transported on its own axles) including tongue may not exceed 75 feet. The width may not exceed a box (base) width of 16 feet.

The eave(s) for a box of less than 16 feet may not exceed 30 inches. The eave(s) for a 16-foot box may not exceed 16 inches. The total width (box and eaves) must not exceed 18 feet.

Permits with widths up to 14 feet wide are governed by the Manufactured Home Movement Route map. The Department of Transportation reviews moves that are greater than 14 feet wide and/or 16 feet high on a case-by-case basis.

Modular Homes

Modular homes are transported on registered/licensed trailers, and are not treated like mobile homes. They must comply with all standard oversize load codes and regulations.

The manufactured home-restricted map does not apply to modular homes.

Permit Fees

RCW 46.44.0941 lists the various types of permits that may be issued, and the fees to be charged for them:

All overlegal loads, except overweight, single trip
Continuous operation of overlegal loads having either overwidth and/or overheight features only, for a period not to exceed thirty days
Continuous operation of overlegal loads having overlength only, for a period not to exceed thirty days
Continuous operation of a combination of vehicles having one trailing unit that exceeds 53 feet and is not more than 56 feet in length, for a period of one year \$100.00
Continuous operation of a combination of vehicles having two trailing units which together exceed 61 feet and are not more than 68 feet in length, for a period of one year
Continuous operation of a three-axle fixed load vehicle having no more than 65,000 pounds gross weight, for a period not to exceed 30 days
Continuous operation of a four-axle fixed load vehicle meeting the requirements of RCW 46.44.091(1) and weighing no more than 86,000 pounds gross weight, not to exceed 30 days
Continuous movement of a mobile home or manufactured home having nonreducible features not to exceed 85 feet in total length and 14 feet in width, for a period of one year
Continuous operation of a Class C tow truck or a Class E tow truck with Class C rating while performing emergency and non-emergency tows of oversize or overweight, or both, vehicles and vehicle combinations, under rules adopted by the Transportation Commission, for a period of one year
Continuous operation of a Class B tow truck or a Class E tow truck with a Class B rating while performing emergency and non-emergency tows of oversize or overweight, or both, vehicles and vehicle combinations, under rules adopted by the Transportation Commission, for a period of one year
Continuous operation of a two- or three-axle collection truck, actually engaged in the collection of solid waste or recyclables, or both, under Chapter 81.77 or 35.21 RCW or by contract under RCW 36.58.090, for one year with an additional 6,000 pounds more than the weight authorized in RCW 46.16.070 on the rear axle of a two-axle truck or 8,000 pounds for the tandem axles of a three-axle truck. RCW 46.044.041 and RCW 46.44.091 notwithstanding, the tire limits specified in RCW 46.44.042 apply, but none of the excess weight is valid or may be permitted on any part of the federal interstate highway system \$42.00 per 1,000 pounds

Permits for weight may not be issued for periods greater than listed above.

Overweight Fee Schedule

(RCW 46.44.0941)

Weight Over Maximum Legal Capacity in Pounds	Fee Per Mile on State Highways	Weight Over Maximum Legal Capacity in Pounds	Fee Per Mile on State Highways
1 to 9,999	• •	55,000 to 59,999	•
10,000 to 14,999		60,000 to 64,999	
15,000 to 19,999		65,000 to 69,999	
20,000 to 24,999		70,000 to 74,999	\$2.12
25,000 to 29,999	\$.35	75,000 to 79,999	
30,000 to 34,999	\$.49	80,000 to 84,999	\$2.82
35,000 to 39,999	\$.63	85,000 to 89,999	\$3.17
40,000 to 44,999	\$.79	90,000 to 94,999	\$3.52
45,000 to 49,999	\$.93	95,000 to 99,999	\$3.87
50,000 to 54,999	\$1.14	100,000*	\$4.25

^{*}The fee for weights in excess of 100,000 pounds is \$4.25 plus 50 cents for each 5,000 pound increment or portion thereof exceeding 100,000 pounds.

Provided:

- The minimum fee for any overweight permit shall be \$14.00.
- The fee for issuance of a duplicate or transfer permit shall be \$14.00.
- When computing overweight fees that result in an amount other than even dollars, the fee shall be carried to the next full dollar if 50 cents or over and shall be reduced to the previous dollar if 49 cents or under.

Special Motor Vehicle Permit Regulations and Conditions

All original signed permits must be carried in the power unit at all times.

Pilot/Escort Vehicle Requirements

An escort vehicle and operator must comply with the requirements of WAC 468-38-100 Escort Vehicle Requirements. Escort vehicles are required per WAC 468-38-100 when:

- 1. The vehicle(s) or load is over 11 feet wide. Two pilot/escort vehicles are required on two-lane roads, one in front and one in back.
- 2. The vehicle(s) or load is over 14 feet wide. One escort vehicle is required at the rear of the movement on multi-lane highways.
- 3. The vehicle(s) or load is over 20 feet wide. Two pilot/escort vehicles are required on multi-lane undivided highways, one in front and one in back.
- 4. The trailer length, including load, of a tractor/trailer combination exceeds 105 feet, or when the rear overhang of a load measured from the center of the rear axle exceeds one-third of the trailer length plus load of a tractor/trailer or truck/trailer combination. One pilot/escort vehicle is required at the rear of the movement on two-lane highways.
- 5. The trailer length, including load, of a tractor/trailer combination exceeds 125 feet.

 One pilot/escort vehicle is required at the rear of the movement on multi-lane highways.
- 6. The front overhang of a load measured from the center of the front steer axle exceeds 20 feet. One pilot/escort vehicle is required at the front on all two-lane highways.

- 7. The rear overhang of a load on a single unit vehicle, measured from the center of the rear axle, exceeds 20 feet. One pilot/escort vehicle is required at the rear of the movement on two-lane highways.
- 8. The height of the vehicle(s) or load exceeds 14 feet 6 inches. One pilot/escort vehicle with height measuring device (pole) is required at the front of the movement on all state highways and roads.
- 9. The operator, using rearview mirrors, cannot see 200 feet to the rear of the vehicle or vehicle combination.
- 10. In the opinion of the department, a pilot/escort vehicle(s) is necessary to protect the traveling public. Assignments of this nature must be authorized through the department's administrator for commercial vehicle services.

Curfew Hours

Days When Travel is Restricted

Vehicles operating under special permit for overweight/overdimensional, except as provided for in WAC 468-38-075, may be restricted from the state highways on the holidays of New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and the day after Thanksgiving, Christmas Day, and commencing at noon of the day preceding said holidays.

Nighttime Movements

A vehicle or vehicle combinations not exceeding the defined envelope of 12 feet wide, 14 feet 6 inches high and 105 feet long, including legal overhang(s), may move at night. A vehicle or vehicle combination which exceeds the defined envelope may also be permitted to move at night on state highways subject to department preferred hours/routes of travel, and must have "Nighttime movement approved" stated on permits. All night moves must comply with published curfew restrictions. Night means one-half hour after sunset to one-half hour before sunrise. Vehicle and load must have proper lighting (49 CFR 393.11).

Winter Road Restrictions

Movement by permit is prohibited in areas where any of the following signs are displayed: "TRACTION ADVISORY/OVERSIZED VEHICLES PROHIBITED," "CHAINS REQUIRED ON ALL VEHICLES EXCEPT ALL-WHEEL DRIVE," "VEHICLES OVER 10,000 GVWR CHAINS REQUIRED" except vehicles with specific permits listed in WAC 468-38-075.

Permit Refund Policy

Refunds will only be made in cases of department initiated error.

Other Regulations

Other regulations relating to the movement of permitted loads are printed in Chapter 468-38-WAC (Washington Administrative Code).

Use of County Roads or City Streets

The use of county roads or city streets is subject to approval by the jurisdiction that maintains those roadways. This permit from the State of Washington in no way authorizes the use of roadways under local jurisdiction, but if applicable, county/city miles must be included on state permit.

Warning: Rules are subject to change. Holders of monthly or annual permits are subject to current rule. Rules, as described herein, should be periodically reviewed for updates to insure compliance on Motor Carrier Services website at **www.wsdot.wa.gov/commercialvehicle**.

Commuter Curfew Hours

Below is a page from DOT Form 560-002 EF depicting the current commuter curfew hours by vicinity, direction, location, hours, and width of vehicle.

Commuter Curfew Hours: (Monday through Friday only)

Vehicles operating under a Special Motor Vehicle Permit are restricted from the following areas (table). Exemptions are: (1) vehicles with over-width dimensions only, not exceeding the width limits of the table; (2) overweight vehicles only, or with the aforementioned over-width features, that can maintain the speed of surrounding traffic; and (3) vehicles with specific permits as defined in WAC 468-38-075.

DOT Form 560-002 EF Revised 12/2004

Page 2 of 2

Western Regional Permit System

A number of western states have entered into an agreement which authorized the issuance of regional oversize/overweight permits. One of the member states where the load is beginning, ending, or passing through may issue an oversize/overweight permit which authorizes travel for all member states if the vehicle does not exceed the sizes and weights of the envelope vehicle and it is operating on approved routes. The Regional Permit may be obtained through the following locations:

Motor Carrier Services Office (360) 70	04-6340
Spokane Department of Transportation (509) 32	24-6566
Washington Trucking Association 1-800-73	S2-9019 M
Arizona (623) 93	32-2247
Colorado (303) 75	57-9539
Idaho (208) 33	34-8420
Louisiana1-800-65	64-1433
Montana(406) 44	44-7262
Nevada (775) 88	38-7410
New Mexico(505) 82	27-0376
0klahoma 1-877-42	25-2390
Oregon (503) 37	73-0000 Option 1
Texas 1-800-29	99-1700 Option 1, 3
Utah (801) 96	55-4508

State of Issuance

A regional permit may be issued by the origin, pass through, or destination state. The state of issuance will collect the fees for all member states in which the vehicle is permitted for travel. These fees must be paid by credit card, cash, or check.

Envelope Vehicle

The vehicles operating on a regional oversize/overweight permit must comply with the following requirements and maximum dimensions:

Length: 110 feet overall

Width: 14 feet Height: 14 feet

Weight: • 600 pounds per inch of tire width

- 21,500 pounds per single axle
- 43,000 pounds per tandem axle
- 53,000 pounds per tridem (wheelbase more than eight feet, but not more than 13 feet)
- 160,000 pounds gross weight
- Axle, group axle weights, or the weight specified by the permit, whichever is less
- A minimum of five axles is required for the issuance of a regional overweight permit

Special Conditions

The member states have developed a list of special conditions within each state which apply to the operation of the envelope size vehicle. This list must be attached to all regional oversize/overweight permits.

Superloads

(WAC 468-38-405)

Loads over 200,000 pounds gross weight, over 16 feet high, 16 feet wide, and/or 125 feet trailer load length will require special review and must submit written applications before a permit will be issued. The following information is required to move a superload:

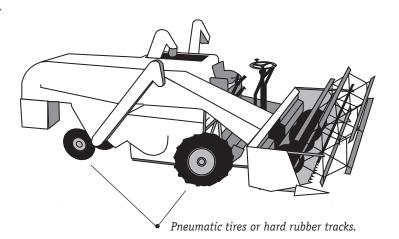

- Describe the purpose of the movement and explain how the public will be served by the movement.
- Submit documentation from private or public entity that the move is necessary.
- You must also demonstrate that movement by other methods of transportation for all or part of the trip is not reasonable.
- Provide a sketch or photograph detailing why it cannot be reduced.
- Provide a sketch of the loaded vehicle configuration showing axle loadings, axle spacing, tire sizes, tires per axle, width, height, and length.
- Propose a route that will handle the height and width of the unit and appears adequate to handle the weight of the vehicle and load. If the route includes the use of county roads or city streets, you must show that permits for the county and/or city will be issued.
- Submit a traffic control plan including the speed, the route, escort vehicle requirements, the times of movement, and the traffic control to ensure safe movement.
- If the department agrees the move is necessary, they will begin an analysis of bridges and pavements along your route. You may be required to pay for this analysis if the time used by the WSDOT staff in conducting this study becomes longer than normally allowed.
- If the analysis shows the bridges or pavement to be inadequate to handle the load, the permit will be denied. If, however, the structures might be strengthened to support the load, and agreement to do so at your expense is settled upon, a permit may be granted.

Farm Implements

(WAC 468-38-290 and RCWs 46.44.130, 46.44.140)

Farm implement means any device that directly affects the production of agricultural products. For purposes of this section, it must meet the following specifications:

- Must weigh less than 45,000 pounds.
- Be equipped with pneumatic tires or hard rubber tracks having protuberances that will not cause damage to the highway.
- Less than 20 feet wide.

Farm Permit Requirements

A farm implement 16 feet wide or less does not require a permit when traveling on the highway system. A farm implement permit can be issued from over 16 feet wide, but less than 20 feet wide for one year.

A quarterly or annual permit to move farm implements may be purchased by a farmer or by a person engaged in the business of selling or maintaining farm implements to move within a designated area, generally three to four counties. The permit is required to be physically present at the time of movement.

An original or faxed permit will allow the person or company identified on the permit to draw, drive, or haul any farm implement on state highways.

For farm implements over 16 feet wide and less than 20 feet wide, a letter must be submitted to the Motor Carrier Services Office in Olympia, 7345 Linderson Way SW, P.O. Box 47367, Olympia, WA 98504-7367, for approval. The counties must be specified.

Safety Requirements for Moving Farm Implements

Oversize Signs

If the farm implement exceeds 10 feet wide, it must display "OVERSIZE LOAD" sign(s) visible to both oncoming and overtaking traffic. Signs must comply with the requirements of WAC 468-38-155. If the implement is both preceded and followed by escort vehicles, a sign will not be required on the implement itself.

Curfew/Commuter Hours

Movement of a farm implement in excess of 10 feet wide must also comply with any published curfew or commuter hour restrictions.

Red Flags

If the farm implement, moving during daylight hours, exceeds 10 feet wide, the vehicle configuration must display clean, bright red flags at least 18 inches square, so as to wave freely at all four corners, or extremities, of the overwidth implement and at the extreme ends of all protrusions, projections, or overhangs.

Warning Lights

Lamps and other lighting must be in compliance with RCW 46.37.160 (hazard warning lights and reflectors on farm equipment). The slow moving vehicle emblem is for equipment moving at a speed of 25 miles per hour or less.

Convoys

Farm implement convoys shall maintain at least 500 feet between vehicles to allow the traveling public room to pass safely. If five or more vehicles become lined up behind an implement, escorted or unescorted, the driver/operator of the transported implement, and escorts, if any, shall pull off the road at the first point wide enough to allow traffic to pass safely. Convoying of farm implements is permitted with properly equipped escort vehicles.

Escort Vehicles

In general, the use of escort vehicles must comply with WAC 468-38-100 (Escort Vehicle Requirements) and WAC 468-38-100 (when escort vehicles are required).

Road Posting

Posting a route may be used in lieu of escort vehicles if the route to be traveled is less than two miles.

Farm Permit Fees

Farmers in the course of farming activities, for any three-month period\$10.00
Farmers in the course of farming activities, for a period not to exceed one year\$25.00
Persons engaged in the business of the sale, repair, or maintenance of such farm implements, for any three-month period
Persons engaged in the business of the sale, repair, or maintenance of such farm implements, for a period not to exceed one year

Washington State County/City Permit Approval

State permits are valid only on the state highway system. If a carrier of oversize or overweight loads needs to use county roads or city streets, approval from the county or city maintaining those roadways must be obtained. The number of county/city miles must be listed on your Washington State permit.

Consult the chart on page 54 for a list of counties and cities along with the appropriate phone numbers to call before moving oversize or overweight loads on county roads.

Procedures for the Movement of Overlegal Vehicles/Loads in Emergency Conditions

Purpose

The following procedures are provided in order for state, and other jurisdictions, to safely secure the equipment necessary to mitigate the proclaimed emergency. Failure to comply with these procedures may result in compounding the emergency by damaging or eliminating available accesses.

Criteria

- The emergency must be proclaimed by the Governor of Washington State and/or other local elected official.
- Other emergent conditions not declared a disaster, but where life or property is in immediate danger, including, but not limited to, oil spills, train derailment, power outages, or storm damage.
- All size and weight criteria, found in RCW 46.44 and WAC 468-38, for the permitted transport of overlegal vehicles/loads must be met.

Procedures

1. **During Normal Office Hours** (7:00 a.m. to 5:00 p.m., Monday through Friday), requests to permit overlegal vehicles/loads should be made to:

Motor Carrier Services 7345 Linderson Way SW P.O. Box 47367 Olympia, WA 98504-7367 Phone: (360) 704-6340 Fax: (360) 705-6350

The carrier must furnish the following information (use permit application whenever possible):

- a. Proposed route, with beginning and ending mileposts.
- b. Height, length, and width at extremities (if overlegal).
- c. If the vehicle(s) is overweight (weight of each axle and spacings between axles, measured from hub centers). A carrier must have a WSDOT Equipment and Axle Spacing Report. The number of that report may be used in lieu of the specific vehicle(s) information.
- d. Description of vehicle and/or load being transported (include sketch if possible).

With this information, the permit number can be given to the driver to expedite the emergency move in lieu of actual permit.

Payment will be by bankcard. The permit will be transmitted by facsimile to a location of carrier's choice.

Also, during normal business hours or when telecommunications are severed, the carrier/provider can obtain a permit in person from any of the statewide special motor vehicle permit offices. Payment of fees may be made by cash, check, money order, or bankcard.

2. **During Non-Business Hours**, authorization for emergency overlegal vehicle/loads must be requested at one of the following five Traffic Management Centers (TMCs):

Seattle:(206) 440-4490Vancouver:(360) 905-2269Tacoma:(253) 536-6089Yakima:(509) 577-1910Spokane:(509) 343-6401

The carrier must furnish the following information to TMC:

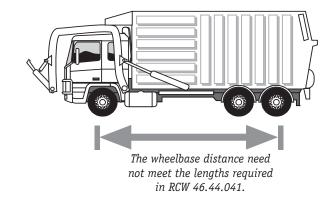

- a. Proposed route.
- b. Description of vehicle and/or load being transported (include sketch if possible).

A permit authorization number will be given to the carrier over the phone. A permit will be issued on the following business day. The TMC will inform the carrier to check Road Restrictions and Bridge Restrictions listed on the Commercial Vehicle website to ensure the route and structures, if any, can accommodate the move.

Refuse Collection Trucks

Two-axle collection trucks may be issued a permit authorizing an additional 6,000 pounds on the rear axle. Three-axle collection trucks may be issued a permit authorizing an additional 8,000 pounds on the rear tandem axles. The wheelbase distance need not meet the lengths required in RCW 46.44.041.

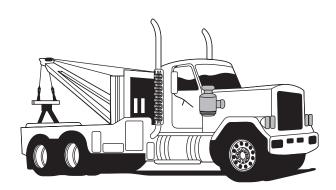

This permit is not valid on interstate highways and tire size limits apply (RCW 46.44.042). The basic fee for collection trucks is \$42 per thousand pounds per year.

A copy of the collection truck restricted bridge list must be attached to the permit.

Tow Trucks

Moves are defined as being hired to move a specific job (not a hazard). No special privilege for obtaining these permits will be granted under normal circumstances. The permit must be in hand and obtained from a local permit office. These moves are NOT exempted for size and weight. If a permit agent is not nearby, or just for faxing convenience, the Washington Trucking Association is available by phone, providing facsimile services.

Annual Tow Truck permits (WAC 468-38-265) are available to Class B and Class C tow trucks. These permits can be used for emergent and non-emergent tows. Annual Tow Truck permits allow extra weight but vehicles are not to exceed:

- 600 pounds per inch of tire width up to 20,000 pounds per single axle; or
- 43,000 pounds per tandem axle set; or
- The weight allowed for axle groups per formula in RCW 46.44.091.

These permits will authorize up to 10 feet wide for disabled vehicles that have been disfigured by an accident or collision.

If towing company does not have an annual tow truck permit:

- **Emergent Tow** During normal business hours (Monday through Friday, 7:00 a.m. to 5:00 p.m.) a permit may be requested from Motor Carrier Services at (360) 704-6345 for emergent tows over the phone.
- **Non-Emergent Tow** All WSDOT offices that issue permits can issue normal permits allowing the movement of oversize or overweight permits to tow trucks.

Note: Emergent in this section means a disabled vehicle on any public highway, including shoulders and access ramps.

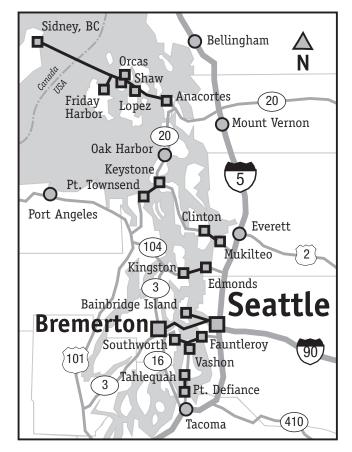

Crossing Puget Sound via Washington State Ferries

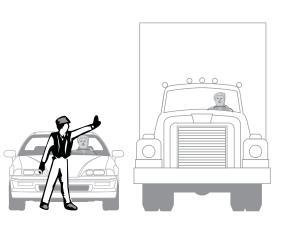

Warning — Ferry Travel — Call Prior to Traveling: Commercial vehicles planning on using Washington State Ferries (WSF) must take special precautions. This requirement is due to the numerous variables associated with traveling on marine highways, such as: terminal, dock, and/or boat load capacities; tidal activity which affects the angle of the loading ramp; and, preferential loading policies. Vehicles registered with a GVW in excess of 80,000 pounds, or exceed 13 feet 4 inches in height measured from the road bed, or exceed 8 feet 6 inches in width at the widest point, or in excess of 85 feet bumper to bumper, must have travel permission from WSF. This requirement is also true if the vehicle is

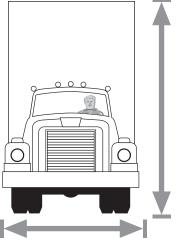

operating under a Special Motor Vehicle Permit for oversize or overweight loads as authorized by RCW 46.44.

To receive approval, contact WSF Information Staff (see phone numbers on next page) allowing 24 hours during the week and 48 hours on the weekends to process your request. Staff is available to assist from 7:00 a.m. to 7:00 p.m., seven days a week. Be prepared to provide the following information (forms are available):

- Gross weight.
- Total length of vehicle or vehicle combination.
- Height from road to highest point.
- Width at widest point on vehicle.
- Ground clearance from road to lowest point on vehicle.
- Number of axles.
- Weight per axle, with load, for the trip in question.

Vehicles with a GVW in excess of 80,000 pounds, or exceed 13 feet 4 inches in height measured from the road bed, or exceed 8 feet 6 inches in width at the widest point, or in excess of 85 feet bumper to bumper, must have travel permission from WSF.

Maximum Width: 8 feet 6 inches

WSF Ferry Travel Request/Permit

If the vehicle has a registered GVW for more than 80,000 pounds, but the vehicle and load for the trip in question are under 80,000 pounds, and all height and width criteria are met, the operator may display a dated and printed weight slip, verifying the GVW, in lieu of contacting the WSF for written approval. All other vehicles more than 80,000 pounds, but less than 105,000 pounds, that meet the height and width criteria, must present an approved WSF Ferry Travel Request/Permit. These vehicles will be provided access on a first come, first served basis.

WSDOT Special Motor Vehicle Permit — WSF Ferry Travel Request/Permit

Vehicles operating under a Special Motor Vehicle Permit, as authorized by RCW 46.44, for oversize or overweight loads must receive prior approval from WSF before securing a WSDOT Special Motor Vehicle Permit for trips including travel on a ferry route. If the request is approved, it will include a specific sailing, scheduled with the customer on a priority basis. If the sailing is missed or canceled, the trip must be rescheduled with WSF.

Hazardous Materials

Federal regulations (49 CFR) prohibit the transport, by ferries while carrying passengers, such as, but not limited to, the following common compressed gases: commercial propane, butane, acetylene, and gasoline. Hazardous material charters are available and request for charters must be made seven days in advance to allow time for securing a charter agreement.

Tank trucks must demonstrate that cargo being carried meets the requirements of 49 CFR and any empty tank truck must certify that they are vapor free prior to being allowed to board the ferries.

Contacting Washington State Ferries

For more detailed information, the following phone numbers are provided:

Internet Home Page
WSF customer service agent to work with truck requests(206) 390-8543 Fax: (206) 515-3846
For travel requests (7 days a week, 7:00 a.m. to 7:00 p.m.)

All trucks with a GVW greater than 16,000 pounds are required to go through scales.

Section Five

Alcohol Misuse and Substance Abuse Testing

(49 CFR, Part 382)

Under the Uniform Commercial Driver's Act, operating a commercial motor vehicle within Washington State with a controlled substance in your system is illegal.

Safety Sensitive Functions

Under federal regulations (49 CFR, Part 382), you may not perform any safety sensitive functions while:

- Using alcohol.
- Having a breath alcohol concentration of 0.04 percent or greater.
- Within four hours after using alcohol.
- Post-accident alcohol test alcohol use prohibited until post-accident test completed or eight hours has elapsed.
- Refusing to submit to alcohol test.

Safety sensitive functions are defined in 49 CFR, Part 382.107 as follows:

- Time at a carrier or shipper plant, terminal facility, or other property, waiting to be dispatched.
- Time inspecting equipment as required by 49 CFR, 392.7 and 392.8, or otherwise inspecting, servicing, or conditioning a commercial motor vehicle.
- Time spent in or on any commercial vehicle. You may use the sleeper berth.
- Time spent loading or unloading a vehicle, supervising or assisting in the loading or unloading, attending a vehicle being loaded or unloaded, remaining in readiness to operate the vehicle, or in giving or receiving receipts for shipments loaded or unloaded.
- Time spent performing driver requirements relating to accidents.
- Time spent repairing, obtaining assistance, or remaining in attendance upon a disabled vehicle.

Alcohol tests are *required* for the following:

- Post Accident Conducted after accidents on those drivers whose performance could have contributed to the accident and for all fatal accidents.
- Reasonable Suspicion Conducted when a trained supervisor or company official observes behavior or appearance that is characteristic of alcohol misuse.
- Random Conducted on a random, unannounced basis just before, during, or just after the performance of safety sensitive functions.
- Return to Duty and Follow-Up Conducted when an individual who has violated the prohibited alcohol conduct standards returns to performing safety sensitive duties. Follow-up tests are unannounced and at least six test must be conducted in the first 12 months after a driver returns to duty. Follow-up testing may last up to 60 months after returning to duty.

Note: Rules no longer require pre-employment alcohol testing, but they also do not prevent the employer from doing so.

Random Testing for Alcohol

- Must be conducted just before, during, or just after a driver's performance of safety sensitive duties.
- The driver is randomly selected for testing usually from a "pool" of drivers subject to testing.
- Tests are unannounced and are with unpredictable frequency throughout the year.
- Each year, the number of random tests conducted by the employer must equal at least 10 percent of all the safety sensitive drivers.
- Must be done using evidential breath testing devices approved by the National Highway Traffic Safety Administration (NHTSA).
- Two breath tests are required to determine if a person has a prohibited alcohol concentration. A screening test is conducted first. Any result less than 0.02 alcohol concentration is considered a "negative" test. If the alcohol concentration is greater than 0.02, but less than 0.04 (24 hours off), if greater than 0.04, a second confirmation test is conducted.
- The driver and the individual conducting the breath test complete the alcohol testing form to ensure that the results are properly recorded.
- Confirmation test results determine actions taken.
- Employers are responsible for implementing and conducting the testing programs. They may do this using their own employees, contract services, or by joining together in a consortium that provides services to all member companies.

Consequences of Alcohol Misuse

- If you engage in prohibited alcohol conduct you must be immediately removed from safety sensitive functions.
- You cannot return to safety sensitive duties until you have been evaluated by a substance abuse professional and complied with any treatment recommendations.
- If you have alcohol in your system (defined as greater than 0.02 but less than 0.04) when tested, you must be removed from safety sensitive functions for 24 hours.
- RCW 46.25.110 states:
 - You may not drive, operate, or be in physical control of a commercial motor vehicle while having alcohol in your system.
 - Law enforcement must place you out-of-service for 24 hours when you drive, operate, or are in physical control of a commercial motor vehicle while having alcohol in your system.
- RCW 46.25.120 states:
 - That if you operate a commercial motor vehicle within Washington, you have given consent, subject to RCW 46.61.506, to take a test or tests of your blood or breath for the purpose of determining your alcohol concentration or the presence of other controlled substances.
- Employers must provide detailed information about alcohol misuse, the employer's policy, the testing requirements, and how and where drivers can get help for alcohol misuse.
- Supervisors of safety-sensitive drivers must attend at least one hour of training on alcohol misuse symptoms and indicators used in making determinations for reasonable suspicion testing.
- The employer is not required to provide rehabilitation, pay for treatment, or reinstate the driver in his or her safety sensitive position.
- Driver alcohol testing records are confidential.

Rules Relating to Controlled Substances

Controlled substance testing rules have been in effect since November 1988 for interstate drivers. The WUTC adopted the controlled substance rules for Washington intrastate drivers in June and July of 1994. The Federal Motor Carrier Safety Administration's (FMCSA) new rules related to controlled substance testing split samples became effective on August 15, 1994.

Controlled substance testing rules cover the same drivers as alcohol testing rules.

Types of Tests Required

- Pre-employment
- Random
- Reasonable suspicion
- Return to duty
- Post-accident
- Follow-up

Controlled substance testing is conducted by analyzing a driver's urine specimen. The driver provides a urine specimen in a location that affords privacy and the "collector" seals and labels the specimen, completes a chain of custody document, and prepares the specimen and accompanying paperwork for shipment to a controlled substance testing lab.

Analysis is performed at laboratories certified and monitored by the U.S. Department of Health and Human Services (DHHS). There are over 90 DHHS labs located throughout the United States. A list of DHHS approved labs is published monthly in the *Federal Register*.

Specimens Analyzed

Specimens are analyzed for the following controlled substances:

- Marijuana (THC metabolite)
- Cocaine
- Amphetamines
- Opiates (including heroin)
- Phencyclidine (PCP)

All controlled substance test results are reviewed and interpreted by a Medical Review Officer (MRO) before they are reported to the employer.

Controlled substance rules prohibit any unauthorized use of the controlled substances. Illegal use of controlled substances by safety sensitive drivers is prohibited on or off duty. The FMCSA has some additional rules that prohibit use of legally prescribed controlled substances by safety sensitive drivers while involved in interstate commerce.

Consequences of a Positive Controlled Substance Test

- A driver will be required to reinstate their driver's license with DOL for a \$150.00 fee.
- A driver must be removed from safety sensitive duty.
- A driver cannot be returned to safety sensitive duties until he/she has been evaluated by a substance abuse professional, has complied with recommended rehabilitation, and has a negative result on a return-to-duty controlled substance test.
- Follow-up testing to monitor the driver's abstinence from controlled substance use may be required.

Random Testing

- Employers are responsible for conducting random, unannounced controlled substance tests.
- At least 50 percent of safety sensitive drivers must be tested each year.
- Once notified of selection for testing, a driver must proceed to a collection site to accomplish the urine specimen collection.

Other provisions of Part 382 include the requirement for employers to provide information on controlled substance use and treatment resources to safety sensitive drivers. All supervisors and officials of businesses with safety sensitive drivers must attend at least one hour of training on the signs and symptoms of controlled substance abuse and another 60 minutes of training on alcohol misuse. Driver controlled substance testing results and records are confidential.

Records Retention Requirements

Must maintain for five years:

- Alcohol test results indicating a Breath Alcohol Concentration (BAC) of 0.02 or greater.
- Verified positive controlled substance test results.
- Refusals to submit to required alcohol and controlled substance tests.
- Required calibration of Evidential Breath Testing (EBT) devices.
- Driver evaluation and referrals.
- Annual calendar year summary.
- Records related to alcohol/controlled substance testing program.

Must maintain for **two** years:

• Records related to the collection process.

Must maintain for **one** year:

- Negative and canceled controlled substance test results.
- Alcohol test results indicating a BAC of less than 0.02.

Must maintain for **indefinite** period:

• Records related to training and education of BATs, STTs, supervisors, and drivers (while the person performs these functions and for an additional two years).

All records shall be maintained in a secure location with limited access, and shall be made available for inspection by authorized representatives of any US DOT agency or state regulatory agencies.

All employers, including owner/operators, must provide educational materials that explain the requirements of Part 382 and the policies and procedures with respect to meeting the requirements. The employer must ensure that a copy of the materials is given to each driver. Each driver must sign a statement certifying that he/she has received a copy of the materials. The employer must keep the original signed statement, but may give the driver a copy.

Section Six

Compliance Review/Safety Audit

A compliance review is a comprehensive review of a motor carrier's compliance with all applicable federal and state safety regulations. This involves a review of the regulations with company management, review of documents relating to accidents, drivers, and equipment, as well as inspection of equipment at the carrier's terminal.

Companies will receive a compliance review for one of the following actions:

- Complaints.
- Accidents.
- When vehicles/drivers jump an out-of-service order.
- Critical safety violations for drivers and/or equipment identified from Safetynet.
- Hazardous materials violations.

Much of this information will come from Safetynet, a national database, where profiles and targeting methods are used to identify carriers with safety compliance problems.

What Can a Carrier Expect When Contacted for a Compliance Review?

In most cases, an officer will contact the carrier official and make an appointment to do the review. Under some conditions (e.g., an accident, jumping an out-of-service order), officers may not make an appointment and just show up to conduct the review. This will only happen in extreme cases.

When the officer arrives, he/she will meet with carrier management and review violation information. All information is input into a laptop computer during the review. The officer will ask for the carrier's total mileage, review accident files and records, and figure the carrier's accident rate per million miles. An equipment list of all equipment operated by the carrier will be reviewed. Also, a review of the insurance policy, checking for proper liability limits and that each piece of equipment operated is covered.

Compliance with the following parts and subparts contained in the Code of Federal Regulations (49 CFR) will then be checked:

• Part 382:

Controlled substance abuse and alcohol misuse and testing. (Applies to every person who operates a commercial motor vehicle in interstate or intrastate commerce and who is subject to commercial driver's license (CDL) requirements.)

Part 383:

Commercial Driver's License Standards.

• Part 391:

Qualifications of Drivers.

• Part 393:

Parts and Accessories Necessary for Safe Operations.

• Part 395:

Hours of Service for Drivers. Washington Administrative Codes for certain driver's hours of service regulations.

Part 396:

Inspection, Repair, and Maintenance.

Part 397:

Transportation of Hazardous Materials, Driving, and Parking Rules.

• Parts 100 through 177:

Hazardous Materials Regulations.

Officers will hold an exit interview with company officials to discuss any violations found, and they will recommend methods to correct any safety violations. Company management will be requested to submit a letter detailing remedial action if safety violations have been found. Companies will be rechecked at a future date to make sure compliance is obtained.

New Entrant Safety Assurance Program

The purpose of the safety audit is to provide educational and technical assistance for new entrant motor carriers (any carrier applying for a new USDOT number on or after January 1, 2003) and to gather safety data to make an assessment of the new entrant's safety performance and adequacy of its basic safety management controls. A safety audit should be conducted on the new entrant, once it has been in operation for at least three months. This rule applies to both U.S. and Canadian carriers.

The safety audit will focus on the new entrant's basic safety management systems by reviewing the following (1) driver qualifications; (2) driver records of duty status; (3) vehicle maintenance; (4) accident register; (5) controlled substances and alcohol use and testing requirement; and (6) hazardous materials, if applicable. The audit will not result in a safety rating. It will result in a pass or fail notification.

Pass — If the safety audit discloses that the new entrant has adequate safety management controls in place, the Federal Motor Carrier Safety Administration (FMCSA) will provide a new entrant with written notice, no later than 45 days after the completion of the audit, that is has passed the audit.

Fail — If the safety audit discloses that the new entrant's basic safety management controls are inadequate, the FMCSA will provide the new entrant with written notice, no later than 45 days after the completion of the safety audit, that its USDOT new entrant registration will be revoked and its operations placed out-of-service unless it takes action to remedy its safety practices.

How to Obtain a USDOT Number

Before a motor carrier begins interstate operations, it must apply for registration with FMCSA and receive a USDOT number. To successfully complete the application process, a carrier must correctly complete and file:

- 1. The MCS-150, the Motor Carrier Identification Report; and
- 2. The MCS-150-A, the Safety Certification for applications for USDOT number.

The FMCSA will review these documents and, upon approval, the carrier will be given a new entrant registration (USDOT number). Failure to complete these documents will delay processing of a carrier's application for new entrant registration. The new entrant can apply for registration with FMCSA to receive a USDOT number via the Internet (www.safer.fmcsa.dot.gov), by mail, or telephone.

Section Seven

Commercial Vehicle Safety Alliance

The Commercial Vehicle Safety Alliance (CVSA) is an international association of federal, state, and provincial officials responsible for the administration and enforcement of motor carrier safety laws in the United States, Canada, and Mexico. CVSA works to promote uniformity, compatibility, and reciprocity of commercial vehicle inspections and motor carrier safety enforcement activities in North America.

The North American Standard is a careful inspection of the CRITICAL items related to commercial motor vehicle safety. To the extent possible, Washington State CVSA qualified inspectors concentrate on those vehicle and driver items most often associated with accidents.

Out-of-Service Criteria

The North American Commercial Vehicle Critical Safety Inspection Items and Out-of-Service Criteria, simply referred to as the "Out-of-Service Criteria," is a document under constant revision. It is published and updated annually by the Commercial Vehicle Safety Alliance and is identical to the Out-of Service Criteria adhered to by the United States Department of Transportation and Canadian regulatory agencies.

CVSA Decal Criteria

The North American Standard is the only inspection that will allow your vehicle to display a CVSA decal. To qualify for a decal, a vehicle must not have any violations of the items found on the North American Commercial Vehicle Critical Safety Inspection Items List.

The decal criteria apply only to the condition of the vehicle, not the driver. It is possible for a driver to be out-of-service and still have the vehicle(s) qualify for the decal.

If each vehicle, whether used singly or in a combination, passes the inspection, a current CVSA decal will be applied to the inspected vehicles. You may display only one CVSA decal per vehicle at a time.

Placement of CVSA Decal

On power units, decals must be placed in the lower right corner of the outside surface of the passenger's windshield.

On any type of trailer, decals must be placed on the right side, at the lower right corner, as near the front as possible.

On passenger buses, decals must be placed on the right front corner post of the bus body directly below the right rear view mirror.

Placing a Vehicle or Driver Out-of-Service

When a vehicle is placed out-of-service, it may not be moved under its own power to a place of repair. The following are two exceptions:

- Vehicles transporting hazardous materials that require placarding may be escorted to a repair facility or safe parking space.
- When the imminently hazardous condition is automatically removed by the disconnection of the power unit from a towed unit, the power unit may be moved. In these instances, the CVSA decal will not be issued.

Movement of a vehicle that has been placed out-of-service is punishable as a gross misdemeanor and will result in the loss of your CDL driving privileges.

There are four mechanical defect conditions which meet this criterion:

- Defective coupling mechanism on the power unit.
- Defective detachable wiring cable to the trailer plug.
- Defective emergency or service brake hoses, or tubing between tractor and trailer.
- A combination vehicle without front end structures or equivalent devices.

When a driver or vehicle is placed out-of-service, the carriers must be notified in the following cases:

- Vehicles transporting hazardous materials that require placarding or prohibit leaving the vehicle unattended.
- Vehicles transporting perishable commodities.
- Cargo tanks transporting commodities that require temperature control.
- Vehicles transporting livestock or other living creatures.
- When alcohol and/or controlled substance usage by the driver is suspected or confirmed.
- Vehicles transporting mail for the U.S. Postal Service (USPS). When vehicles or drivers of Highway
 Mail Carriers (HMC) are placed out-of-service, telephone notice of the out-of-service action shall be
 given to both the USPS and the HMC. The USPS manuals require a driver who is delayed en route
 to contact postal personnel at the location of his/her scheduled stop. The driver can supply this
 information to the inspector.

In all contacts with the carrier, they will be advised that responsibility for protection of the vehicle, its cargo, accessories, and contents rests solely with the carrier. In driver out-of-service actions, the carrier should be informed that action does not prohibit the driver from remaining on duty with the vehicle, rather, the action prohibits the driver from driving a vehicle until he/she has met the requirements of the specified section found to be in violation.

Section Eight

Motor Carriers Operating For Hire

Registered Carriers — Single State Registration System (SSRS)

(WAC 480-14-300 and WAC 480-15-900)

Interstate carriers operating under the authority of the U.S. Department of Transportation, Federal Motor Carrier Safety Administration (FMCSA) — its successor agency — are known as "MC" carriers.

The Single State Registration System (SSRS) program, created to succeed the "bingo card" program administered by the ICC, is a base-state system whereby a MC carrier registers its interstate operating authority with and provides proof of insurance to one state (a base-state) instead of multiple states.

Under the SSRS program, MC carriers whose principal place of business is in Washington State must register with the Washington Utilities and Transportation Commission (WUTC). The registration must be renewed annually.

This type of carrier must:

- Have secured valid insurance.
- Be registered with a base state.
- Carry a legible receipt showing base state registration.
- Present the receipt for inspection by law enforcement agents.

Carriers registering with their base state pays the state of Washington \$10.00 per vehicle for each vehicle operated in this state.

Each vehicle must display a current SSRS receipt (single state registration). **Note:** Carrier may display either an original or copy of a receipt. The receipts issued by each state participating are slightly different, but all contain the same basic information:

- Name and address of the state and agency issuing the receipt.
- Name and address of the carrier to whom the receipt is issued.
- The effective date of the receipt.
- The expiration date of the receipt.
- A list of the states in which the carrier has paid fees to operate.

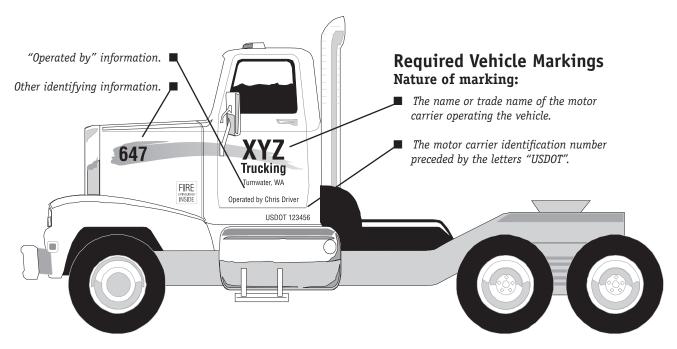

Registered Exempt Carriers

(WAC 480-14-320 and WAC 480-15-900)

Interstate motor carriers transporting commodities exempt from the Federal MC operating authority requirements must register with the WUTC and file proof of insurance. Registered exempt carriers are issued a registration receipt that contains the same information as the receipt issued to MC carriers under the SSRS Program, but only reflects Washington State operations. The registration must be renewed annually.

To determine your WUTC interstate registration status, use the following table:

Is your vehicle operating for hire?		No WUTC registration is needed.		
Is your vehicle subject to regulation, (not exempt or private)?		No WUTC registration is needed.		
	YES			
Are you hauling interstate?		Must display an SSRS receipt if an MC number is used or if you are hauling regulated materials.	r is used or exempt registration	
Are you hauling intrastate?	YES	S Carrier must display a WUTC permit.		

Required Vehicle Markings

Interstate For-Hire Carriers — 49 CFR 390.21 Marking of Commercial Motor Vehicles

- (a) **General.** Every self-propelled commercial motor vehicle operated in interstate commerce and subject to the rules of subchapter B of this chapter must be marked as specified in paragraphs (b), (c), and (d) of this section. Self-propelled commercial motor vehicles operated by for-hire motor carriers under authority issued by the Federal Motor Carrier Safety Administration (FMCSA) may meet the requirements of this section by complying with the marking requirements set forth in 49 CFR section 365-378. To apply for a DOT number, visit **www.safersys.org**.
- (b) **Nature of marking.** The marking must display the following information:
 - 1. The legal name or a single trade name of the motor carrier operating the self-propelled commercial motor vehicle, as listed on the motor carrier identification report (Form MCS-150) and submitted in accordance with Part 390.19.
 - 2. The motor carrier identification number issued by the FMCSA, preceded by the letters "USDOT."
 - 3. If the name of any person other than the operating carrier appears on the CMV, the name of the operating carrier must be followed by the information required by paragraphs (b)(1) and (2) of this section, and be preceded by the words "operated by."
 - 4. Other identifying information may be displayed on the vehicle if it is not inconsistent with the information required by this paragraph.
 - 5. Each motor carrier shall meet the following requirements pertaining to its operation:
 - i. All commercial motor vehicles that are part of a motor carrier's existing fleet on July 3, 2000, and which are marked with an ICCMC number must come into compliance with paragraph (b)(2) of this section by July 3, 2002.
 - ii. All CMVs that are part of a motor carrier's existing fleet on July 3, 2000, and which are not marked with the legal name or a single trade name on both sides of their commercial motor vehicles, as shown on the Motor Carrier Identification Report, Form MCS-150, must come into compliance with paragraph (b)(1) of this section by July 5, 2005.

iii. All commercial motor vehicles added to a motor carrier's fleet on or after July 3, 2000, must meet the requirements of this section before being put into service and operating on public ways.

(c) Size, shape, location, and color of marking. The marking must:

- 1. Appear on both sides of the self-propelled commercial motor vehicle.
- 2. Be in letters that contrast sharply in color with the background on which the letters are placed.
- 3. Be readily legible, during daylight hours, from a distance of 50 feet while the commercial motor vehicle is stationary.
- 4. Be kept and maintained in a manner that retains the legibility required by paragraph (c) (3) of this section.
- (d) Construction and durability. The markings may be painted on the commercial motor vehicle or may consist of a removable device, if that device meets the identification and legibility requirements of paragraph (c) of this section, and such markings shall be maintained in such a manner as to remain legible as required by this section.
- (e) Rented commercial motor vehicles. A motor carrier operating in a self-propelled commercial motor vehicle under a rental agreement having a term not in excess of 30 calendar days may meet the requirements of this section in either one of two ways:
 - 1. The commercial motor vehicle is marked in accordance with the provisions of paragraphs (b) through (d) of this section, or
 - 2. The commercial motor vehicle is marked as set forth below:
 - i. The name or trade name of the lessor is displayed in accordance with paragraphs (c) and (d) of this section;
 - ii. The lessor's identification number preceded by the letters "USDOT" is displayed in accordance with paragraphs (c) and (d) of this section; and
 - iii. The rental agreement entered into by the lessor and renting motor carrier conspicuously contains the following information:
 - a. The name and complete physical address of the principal place of business of the renting motor carrier;
 - b. The identification number issued to the renting motor carrier by the Federal Motor Carrier Safety Administration (FMCSA), preceded by the letters "USDOT," if the motor carrier has been issued such a number. In lieu of the identification number required in this paragraph, the following may be shown:
 - Information which will indicate if the motor carrier is engaged in "interstate" or "intrastate" commerce, and
 - Information which will indicate if the renting motor carrier is transporting hazardous materials in the rented commercial motor vehicle.
 - c. The sentence, "This lessor cooperates with all federal, state, and local law enforcement officials nationwide to provide the identity of the customers who operate this rental commercial motor vehicle."
 - iv. The rental agreement entered into by the lessor and the renting motor carrier is carried on the rental commercial motor vehicle during the full term of the rental agreement.

Intrastate For-Hire Carriers

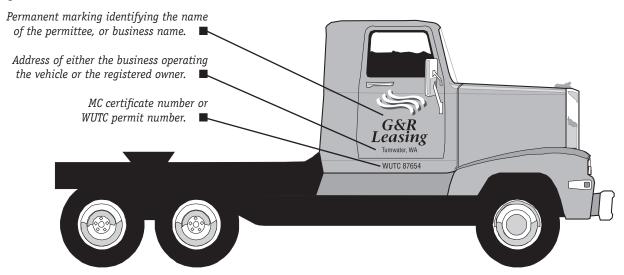

(RCW 81.80.305)

Markings Required

- 1. All motor vehicles other than those exempt under subsection (2) of this section, must display a permanent marking identifying the name or number, or both, on each side of the power unit. For a motor vehicle that is a common or contract carrier under permit by the WUTC as described in subsection (3) (a), a private carrier under subsection (4), or a leased carrier as described in sub-section (5) of this section, any required identification that is added, modified, or renewed after September 1, 1991, must be displayed on the driver and passenger doors of the power unit. The identification must be in a clearly legible style with letters no less than three inches high and in a color contrasting with the surrounding body panel.
- 2. This section does not apply to (a) vehicles exempt under RCW 81.80.040, and (b) vehicles operated by private carrier that singly or in combination are less than thirty-six thousand pounds gross vehicle weight.
- 3. If the motor vehicle is operated as:
 - a. A common or contract carrier under a permit by the WUTC, the identification must contain the name of the permittee, or business name, and the permit number, or
 - b. A common or contract carrier holding both intrastate and interstate authority, the identification may be either the MC certificate number or WUTC permit number.
- 4. If the motor vehicle is a **private carrier**, the identification must contain the name and address of either the business operating the vehicle or the registered owner.
- 5. If the motor vehicle is operated under lease, the vehicle must display either permanent markings or placards on the driver and passenger doors of the power unit. A motor vehicle under lease
 - a. That is operated as a common or contract carrier under permit by the commission must display identification as provided in subsection (3) (a) of this section, and
 - b. That is operated as a private carrier must display identification as provided in subsection (4) of this section.

Intrastate Markings Required

Must be displayed on the driver and passenger doors.

Insurance Filing Requirements — WUTC Carriers

Intrastate

Motor carriers of property, for-hire carriers of passenger and solid waste collection companies must have a minimum amount of liability and property damage insurance. See *Permit/Certificate Requirements*.

- You are required to have an insurance company file evidence of liability and property damage insurance. The insurance filed must be written by a company authorized to conduct business in the state of Washington.
- If you fail to file and keep insurance in full force and effect, you will not be allowed to apply for a WUTC permit or if you have a permit, it will be canceled.
- You must submit your evidence of insurance on a uniform motor carrier bodily injury and property damage liability certificate of insurance (Form E).

If you are a motor carrier of property operating a commercial motor vehicle in interstate or foreign commerce, you must have a minimum amount of insurance as prescribed by 49 CFR, Part 387. You must have proof of insurance of the minimum level of insurance at your company's principal place of business and you must file proof of insurance with your Single State Registration System (SSRS) or exempt registration.

Private carriers operating in Washington intrastate commerce are not required to file insurance with the Washington Utilities Commission. You must, however, comply with the insurance limits contained in Title 46 RCW.

Proof of insurance for interstate carriers can be any of the following:

- Endorsement(s) for Motor Carrier Policies of Insurance for Public Liability under Sections 29 and 30 of the Motor Carrier Act of 1980 (Form MCS-90) issued by an insurer(s).
- Endorsement(s) for Motor Carrier Policies of Insurance for Public Liability under Section 18 of the Bus Regulatory Reform Act of 1982 (Form MCS-90B) issued by an insurer(s).
- A Motor Carrier Surety Bond for Public Liability Under Sections 29 and 30 of the Motor Carrier Act of 1980 (Form MC-82) issued by a surety.
- A Motor Carrier Public Liability Surety Bond Under Section 18 of the Bus Regulatory Reform Act of 1982 (Form MCS-82B) issued by a surety.
- A written decision, order, or authorization of the Federal Highway Administration (FHWA) authorizing the motor carrier to self-insure under 49 CFR, Part 1043.5.

Permit/Certificate Requirements — WUTC Carriers

Property and passenger carriers who provide transportation services, by motor vehicle, over the public highways, for compensation, in the state of Washington, must obtain a permit or certificate from the WUTC.

Intrastate Carriers Transporting Passengers

Charter Bus Operations are defined as transporting a group of persons for compensation who as a group have a common purpose or are under a single contract and have acquired the use of a motor vehicle to travel together to a specific destination or for a particular itinerary. The vehicle used must have seating capacity for seven or more persons excluding the driver. 480-40 WAC

- Certificate issued to any qualifying applicant who submits application, fees, proof of insurance, completes a safety questionnaire, and has vehicles inspected.
- Application fee is \$150.
- Annual regulatory fee \$11 per vehicle.
- No rate regulation.
- Driver and equipment safety compliance audits performed by the WUTC.
- Minimum public liability and property damage insurance:
 - a. Vehicles 16 passenger or less \$1,000,000 combined single limit (CSL).
 - b. Vehicles 17 passengers or more \$5,000,000 CSL.

Excursion Bus Operations are defined as transporting persons for compensation from points of origin within a city, town, or area to another location within the state and returning to that same point of origin (no passengers are picked up or dropped off during the trip). Compensation is charged for on an individual fare basis. The vehicle used must have seating capacity for seven or more persons excluding the driver. 480-40 WAC

- Certificate issued to any qualifying applicant who submits application, fees, proof of insurance, completes a safety questionnaire, and has vehicles inspected.
- Application fee is \$150.
- Annual regulatory fee \$11 per vehicle.
- No rate regulation.
- Driver and equipment safety compliance audits performed by the WUTC.
- Minimum public liability and property damage insurance:
 - a. Vehicles 16 passenger or less \$1,000,000 combined single limit (CSL).
 - b. Vehicles 17 passengers or more \$5,000,000 CSL.

Auto Transportation Companies (regular route/airporter bus services) are defined as transporting persons for compensation between fixed points, or over a regular route. 480-30 WAC

- Certificates are issued under public convenience and necessity standard. Applicant must prove there is an unmet need for service.
- Permanent authority application is \$150.
- Company filed tariffs and schedules. Rates and charges subject to WUTC approval.
- Annual regulatory fee based on percentage of revenue paid with annual report.
- Driver and equipment safety compliance audits performed by the WUTC.
- Minimum public liability and property damage insurance:
 - a. Vehicles 16 passengers or less \$300,000 CSL.
 - b. Vehicles 17 passengers or more \$500,000 CSL.

Note: The requirements listed above for "passenger carriers" do not apply if you are transporting passengers wholly within an incorporated city; operating as a taxicab; operating a hotel or school bus; commuter ride sharing; or transporting persons without compensation.

Private Non-profit Transportation Providers are defined as non-profit corporations that provide transportation services for compensation solely to persons with special transportation needs. Special transportation needs means persons, including attendants, who because of a disability, income, or age, are unable to transport themselves or purchase appropriate transportation. 480-31 WAC

- Certificate issued to any qualifying applicant who submits application, fees, proof of insurance, completes a safety questionnaire.
- Application fee is \$50.
- Annual regulatory fee \$10 per vehicle paid with annual report.
- Driver and equipment safety compliance audits performed by the WUTC.
- Minimum public liability and property damage insurance:
 - a. Vehicles less than 16 passenger capacity, including the driver \$500,000 CSL.
 - b. Vehicles more than 16 passengers, including the driver \$1,000,000 CSL.

Intrastate Carriers Transporting Property/Solid Waste Collection Companies

General Commodities Carriers are defined as transporting all types of goods or property, excluding residential household goods. 480-14 WAC

- Permit is issued to any applicant who submits application, fees, proof of insurance, completes a safety questionnaire.
- Application fee is \$275 for new entrants and \$100 for extension.
- Driver and equipment safety compliance audits performed by the WSP.
- Vehicles under 10,000 GVWR Property (non-hazardous) \$300,000 CSL.
- Vehicles over 10,000 GVWR Property (non-hazardous) \$750,000 CSL.
- Hazardous substances, as defined in 49 CFR 171.8 transported in cargo tanks, portable tanks, on hopper-type vehicles with capacities in excess of 3,500 water gallons; or in bulk, poison gas, liquefied compressed gas, or compressed gas; or highway route controlled quantity of radioactive materials – \$5,000,000 CSL.
- Oil, hazardous waste, hazardous materials, and hazardous substances defined in 49 CFR, Part 171.8 and listed in 49 CFR, Part 172.101 not listed above \$1,000,000 CSL.

Household Goods Movers are defined as transporting items used or to be used in a household, when part of a household, between residences or between a residence and a storage facility. 480-15 WAC

- Application fee is \$250 for temporary authority and \$550 for permanent authority. New entrants must apply for both temporary and permanent authority. Operations under temporary will be used in determining if permanent authority should be granted.
- Must have cargo insurance \$10,000 for household goods transported in vehicles less than 10,000 GVWR and \$20,000 for household goods transported in vehicles with 10,000 GVWR or more.
- WUTC publishes tariff of rates and charges that must be followed.
- Annual regulatory fee based on percentage of revenue paid with annual report.
- Driver and equipment safety compliance audits performed by the WUTC.
- Minimum public liability and property damage insurance for household goods movers is the same as above for General Commodities Carriers.

Freight Brokers. Freight brokering operations are defined as arranging for the transportation of general commodities or household goods by motor carriers. 480-12 WAC

- Registration fee is \$25.
- Intrastate Broker must file a \$10,000 bond.
- Interstate Broker must file a copy of their FHWA operating authority and broker bond.

Solid Waste Collection Companies are defined as those carriers who transport for compensation, garbage, refuse, or biohazardous or biomedical waste for collection and/or disposal. Solid waste also includes residential source-separated recyclable materials. 480-70 WAC

- "Garbage" or "refuse" means animal or vegetable waste, scrap, waste materials, discarded articles, rubbish, debris, worthless or discarded materials.
- "Biohazardous or biomedical waste" means untreated solid waste including human body fluids, cultures, disease waste and sharps.
- Certificates are issued under public convenience and necessity standard. Applicant must prove there is an unmet need for service.
- Permanent authority application fee is \$150, temporary authority \$35.
- Company filed tariffs, rates and charges subject to WUTC approval.
- Annual regulatory fee based on percentage of revenue paid with annual report.
- Driver and equipment safety compliance audits performed by WUTC.
- Vehicles under 10,000 GVWR \$300,000 CSL.
- Vehicles over 10,000 GVWR \$750,000 CSL.
- Vehicles over 10,000 GVWR transport quantities of biomedical waste not subject to federal regulation \$1,000,000 CSL.

Do I Need a Commercial Driver's License?

There are three types of Commercial Driver's Licenses:

- Class A
- Class B
- Class C

To see if you need a Commercial Driver's License, follow the shaded area in the chart:

Is the manufacturer's weight rating of your trailer 10,001 pounds or more?	YES, Is the manufacturer's and weight rating of your combination 26,001 pounds or more?	If so,	You need a CDL Class A license			
•	Is the manufacturer's weight rating of your <i>single</i> vehicle 26,001 pounds or more (includes all buses)?					
Is your vehicl 16 or more person	YES, then	You need a CDL Class C license				
Is your vehicle a public schoweight <i>under</i> 26,001 pounds	YES, then	You need a CDL Class C license				
Does your vehicle carry placarded	YES, then	You need a CDL Class C license				
	e you are driving of the above conditions	THEN	You <i>DO NOT</i> need a CDL license

85					105,000	105,500	105,500	105,500
86 or more	2				105,500	105,500	105,500	105,500

When inches are involved — under 6 inches, take the lower; 6 inches or over, take the higher (except between 8 and 9 feet).

Penalty Formula for Overweight Vehicles

Calculating overweight penalties under RCW 46.44.105 is a three-step process.

Step One

RCW 46.44.105(1)

The officer must determine whether the violation is the first, second, third, or subsequent violation in any calendar year. The actual base penalty is found in the Washington Court Rules in the section on Infraction Rules for Limited Jurisdiction Courts (IRLJ) Rule 6.2 (d). The base penalty listed in the rule is multiplied by 90 percent to determine the Public Safety and Education Assessment (PSEA). The two amounts are added together for the first part of the total penalty.

First Offense \$65.00 (base penalty) + \$58.00 (PSEA) = \$123.00 Second Offense \$95.00 (base penalty) + \$85.00 (PSEA) = \$180.00

Third Offense and Subsequent Offense \$110.00 (base penalty) + \$99.00 (PSEA) = \$209.00

Step Two

RCW 46.44.105(2)

The second step involves determining the per pound overweight penalty. There are two per pound penalties (a flat dollar amount and a cent per pound amount) that must be added together to arrive at the total per pound penalty. For weights under 4,001 pounds, there is only the cents per pound amount penalty.

Step Three

Add the amounts from **Step One** and **Step Two** for the **Total Penalty Due**.

0 to 4,000 pounds	\$0 + 3 cents a pound for each pound overweight up to 4,000 pounds (i.e., 4,000 pounds would be 4,000 pounds x 3¢ per pound = \$120.00)
4,001 to 10,000 pounds	\$120.00 + 12 cents a pound for each pound over 4,000 pounds (i.e., 6,000 pounds would be \$120 + 2,000 pounds x 12¢ = \$360.00)
10,001 to 15,000 pounds	$$840.00 + 16 \text{ cents a pound} \text{ for each pound over } 10,000 \text{ pounds}$ (i.e., 12,000 pounds would be $$840.00 + 2,000 \text{ pounds } x \ 16 = $1,160.00$)
15,001 to 20,000 pounds	\$1,640.00 + 20 cents a pound for each pound over 15,000 pounds (i.e., 17,000 pounds would be \$1,640.00 + 2,000 pounds x 20¢ = \$2,040.00)
20,001 or more pounds	\$2,640.00 + 30 cents a pound for each pound over 20,000 pounds (i.e., 22,000 pounds would be \$2,640.00 + 2,000 pounds x 30¢ = \$3,240.00)

Table of Minimum Liability Insurance Requirements

Vehicles — over 10,000 pounds GVWR non-hazardous property:

\$750,000 combined single limit (CSL)

Vehicles — **under 10,000 pounds GVWR** — non-hazardous property: \$300,000 CSL

Vehicles — **under 10,000 pounds GVWR** — hazardous property; any quantity of Class A or B explosives, any quantity of poison gas (Poison A), or highway route controlled quantity of radioactive materials as defined in 49 CFR 173.455:

\$5,000,000 CSL

Vehicles — **hazardous substances in bulk**, in vehicles with capacities exceeding 3,500 water gallons, explosives A or B (any quantity), poison gas (any quantity), liquefied compressed gas or compressed gas in bulk (containers exceeding 3,500 water gallons), or highway route controlled quantity radioactive materials:

\$5,000,000 CSL

Vehicles — **oil (49 CFR 172.101) hazardous waste**, hazardous materials and hazardous substances listed in 49 CFR 172.101, but not listed in the panel above:

\$1,000,000 CSL

Vehicles — **solid waste collection** (solid waste, garbage and/or refuse):

- Gross Weight Rating (GVWR) less than 10,000 pounds: \$300,000 combined single limit coverage
- Gross Weight Rating (GVWR) 10,000 pounds or more: \$750,000 combined single limit coverage
- Transport quantities of biomedical waste not subject to federal regulation: \$1,000,000 combined single limit coverage
- Transport quantities of hazardous or biomedical waste that are subject to federal regulation: the federal minimum combined single limit

Passenger Charter — **16 passengers or** *less* (excluding limousines):

\$100,000 each person; \$1,000,000 each accident; \$50,000 property damage or \$1,000,000 CSL

Passenger Charter — 17 passengers or *more* (excluding limousines):

\$100,000 each person; \$5,000,000 each accident; \$50,000 property damage or \$5,000,000 CSL

Auto Transportation — **16 passengers or** *less* (other than passenger charter):

\$100,000 each person; \$300,000 each accident; \$50,000 property damage or \$300,000 CSL

Auto Transportation — **17 passengers or more** (other than passenger charter):

\$100,000 each person; \$500,000 each accident; \$50,000 property damage or \$500,000 CSL

Individual's Request for National Driver Register File Check

(Department of Licensing)

A copy of the file check is included at the back of the book.

INDIVIDUAL'S REQUEST FOR NATIONAL DRIVER REGISTER FILE CHECK

In accordance with the Federal Privacy Act of 1974 (Public Law 93-579)

The National Driver Register (NDR) contains only a listing of names and related identification, provided by State driver licensing officials, of those drivers whose driver licenses have been cancelled, denied, revoked, or suspended or who have been convicted of certain serious traffic violations. The NDR does not contain a list of any other drivers. If you have not had a driver license cancelled, denied, revoked, or suspended or have not been convicted of serious traffic violations, you would not be listed in the NDR. Every individual is entitled, however, to request a check of the NDR records to determine whether they appear on the NDR file. The NDR will respond to every valid NDR inquiry.

The record content for those persons who are listed in the NDR files is limited to identification of the state(s) which have taken action to cancel, deny, revoke, or suspend or have records of conviction of serious traffic violations. Any specific information about the driver history, or a request for the entire driver history, may be obtained only from the state(s) where the detailed information is recorded. The state(s) maintaining records are the (only) contacts able to correct records in error, and the NDR will correct its pointer records when so advised by a state indicating that a report previously made to the NDR is in error.

If the NDR has a record on you, the full record will be copied and sent to you including any older records which may have contained a reason for license cancellation, denial, revocation, or suspension. In addition, if such information has been disclosed by the NDR, the recipient of the information will also be identified.

The name and address of the State driver licensing official will be provided for each State listed as having reported information on you to the NDR.

INDIVIDUAL'S REQUEST FOR NATIONAL DRIVER REGISTER FILE CHECK

In accordance with the Federal Privacy Act of 1974 (Public Law 93-579)

The National Driver Register (NDR) contains only a listing of names and related identification, provided by State driver licensing officials, of those drivers whose driver licenses have been cancelled, denied, revoked, or suspended or who have been convicted of certain serious traffic violations. The NDR does not contain a list of any other drivers. If you have **not** had a driver license cancelled, denied, revoked, or suspended or have **not** been convicted of serious traffic violations, you would not be listed in the NDR. Every individual is entitled, however, to request a check of the NDR records to determine whether they appear on the NDR file. The NDR will respond to every valid NDR inquiry.

The record content for those persons who are listed in the NDR files is limited to identification of the state(s) which have taken action to cancel, deny, revoke, or suspend or have records of conviction of serious traffic violations. Any specific information about the driver history, or a request for the entire driver history, may be obtained only from the state(s) where the detailed information is recorded. The state(s) maintaining records are the (only) contacts able to correct records in error, and the NDR will correct its pointer records when so advised by a state indicating that a report previously made to the NDR is in error.

If the NDR has a record on you, the full record will be copied and sent to you including any older records which may have contained a reason for license cancellation, denial, revocation, or suspension. In addition, if such information has been disclosed by the NDR, the recipient of the information will also be identified.

The name and address of the State driver licensing official will be provided for each State listed as having reported information on you to the NDR.

Please type or print plainly. Inquiries that cannot be read cannot be processed.

Requests for National Driver Register (NDR) Record Checks

How to Request an NDR Record Check

Any person may ask to know whether there is an NDR record on him/her and may obtain a copy of the record if one exists. That is the purpose for this form.

Complete the front side, have your signature (or your mark as witnessed) notarized, and mail the completed form to the National Driver Register at the address below.

The NDR response will be mailed to the mailing address shown, but incomplete or illegible inquiries will not be processed. All inquiries will be acknowledged if a return address if readable. Forms which are not notarized will also not be processed.

What to Expect from the NDR Record Check

The NDR will respond to every valid inquiry including requests which produce no record(s) on the NDR file. When records are located, details of the probable match results will be returned to the individual Privacy Act inquirer and will contain all information listed in the NDR records, if any, on the individual. The reply will also indicate any disclosures (reports to others) previously made by the NDR information and will specify who, if anyone, has received reports on the inquirer.

Location of NDR Records

Records can be made available, within a reasonable time after request, for personal inspection and copying during regular working hours at 7:45 am to 4:15 pm, each day except Saturdays, Sundays, and Federal legal holidays. The address for requesting record information in writing directly from the NDR or for making requests in person is:

National Driver Register Nassif Building 400 7th Street, S.W. Washington, DC 20590
